PREFACE

1. The WIQAS Software has been developed in-house by the Software SBU and has been in operation with major SBU's with the primary aim of IT enabling of the record management and generation of various artifacts during QA processes in Inspection section of this establishment. During the course of implementation of WIQAS, it has undergone many requirement change and regression testing which made the software more reliable and futuristic.

The following advantages are envisaged:

(a) Productivity improvement by reduction of manual data entry.

(b) Ease of month-end-register, QA reports and inspection certificates generation.

(c) Defined work flow of File noting makes the process of online QA approval easy and efficient.

(d) The QA related digitized document in form of scanned PDF copy are available across unit LAN.

(e) Searching of File, Supply Order and Offering letters are easy and user friendly.

(f) Software can be customized for use in different units of DGQA without change to source code.

2. This user manual has been prepared for easy use of the WIQAS software by the present set of users and for the users of other establishment.

3. It is pertinent to note that any software is only as good as the quality and integrity of the data entered into it for the resultant to be meaningful, intelligent and accurate information.

4. I am confident that Inspection BEL of this establishment and other units of DGQA will exploit the WIQAS for enhanced productivity and efficiency.

(G K Durga)
ED, Software SBU

1 About This Manual

The purpose of this document is to provide comprehensive guidance and instructions to users on how to effectively use the application for the smooth execution of complete inspection process and record keeping of the digitized documents. This manual serves as a reference guide that helps SBU Admin and CQAE staff to understand the functionalities, features, and best practices for performing their responsibilities efficiently and accurately.

The WIQAS Application is designed to streamline the SO/PO, OL creation, scrutiny, OL inspection, File Noting and I-Note generation process. The user manual aims to empower all the users with the knowledge and skills required to navigate the application, utilize its features effectively, and ensure consistent and thorough inspections.

The document covers all the functionality released in the present application. (This is subjected to change).

This document has been prepared keeping into cognizance all the major use cases that can be part of the application. The document will be regularly updated and re-shared for future releases of the application reflecting additions/deletions of functionality.

2 Introduction to WIQAS application

Web based Inspection and Quality Assurance Software (WIQAS) is first of its kind and fully Integrated Platform that provides end-to-end features for simplifying QA processes in IB and IG sections. WIQAS is a web-based, scalable and high-performance solution to cater all inspection units across pan India.

WIQAS is versatile Inspection and Quality Assurance Software that assures the availability of QA records, Approvals, Enclosures, Reports, I-Notes and Inspection data to facilitate inspection and review process.

The comprehensive design of WIQAS is covering a wide range of highly diverse QA processes which can be applied from a small unit to very large units of DGQA. The system incorporates and can be configured to accommodate all the data and processes required by Inspection Agencies to improve the QA Process efficiently & accurately.

WIQAS emerges as the comprehensive and preferred solution with a scalable architecture with the highest level of integration and innovation as single platform. When Quality is at stake, the choice of a new technology and more importantly right technology becomes critical. WIQAS resolves this with its reliability and an insightful assessment to the challenges and demands of Inspection agencies, not only in CQAE, but across the DGQA.

WIAQS is not just limited to management and maintenance of Inspection records but extends to workflow automation as per the units / roles within units of DGQA. The product also comprehends Alert/Notification, reports and dashboards for data analytics. The impact of this well-orchestrated workflow is seen on the improved service, greater satisfaction, and an overall improvement in efficiencies.

Key Features

WIAQS automates processes of record keeping of QA processes, SO and OL Approvals and Feedback, Liquidation of review remarks, Storage of enclosures, Generation of FCL and FCM, Bilingual File Noting / I- Note Generation with eSign, Scrutiny of PO's received from OPAs, Enclosures, various QA registers, Inspection test schedules, raw material inspection, stage/in-process inspection, functional test, qualification testing, PDI to ensure quality conformance etc.

The WIQAS features unparalleled flexibility & scalability, comprehensive report types, easy customization, intuitive visuals and interactive graphics that simplify complex data, dashboards supported quality initiatives, Trend charts / Graphs and comprehensive drill-down capabilities.

Objective

- User-friendly, easy-to-use & web-enabled application
- Multi-level distributed information system
- Security & privacy (authentication, authorization, privacy policy)
- Single log-in with Role based functionalities
- Data consistency and Transparency
- Robustness, reliability and performance
- Scalability & portability

Benefits

The WIQAS provides an effective solution to reduce the manual effort of CQAE, IB and IG Users and at the same time, provide better service to all the stakeholders.

- It enables improved response to demands of inspection process because it automates 100% QA processes across all the units of collecting, collating and retrieving information across the IB/IG Sections
- Capable of configuring for both on premises and web based access
- It Reduces Approval and observation liquidation cycle time drastically for SO& OL It enables provision for uploading QAP, ATP, drawings and other necessary documents and as attachments.
- It enables secured data backup and retrieval mechanism

- It Provides notification and alerts including voice message
- It aids Admin, QA Inspectors, AC /DC and JC /CQAO with interactive dashboards and Reports
- It Provides Data validation for SO & OL at each stage of QA Process
- It is capable to handle large data in real time
- It aids in generation of QA reports, ISO checklist and inspection certificate i.e. Bilingual I-Notes, Form-IV.

Additionally, the WIQAS provides a host of direct benefits such as easier record management, reduced paperwork, faster information flow between various units, greater organizational flexibility, reliable and timely information, reduced wastage, reduced waiting time and reduced stationary.

Access to the right information and the automation of complex tasks & workflow is the key focus of the WIQAS, enabling inspectors to inspect the right product at the right time.

Modules

The following modules are part of the application:

- Administration Module
- Supply Order & Approval Cycle
- Offering Letter and Approval Cycle
- Approval & Feedback Mechanism
- Alert / Notifications
- Inspection module
- Reports Module
- Dashboard

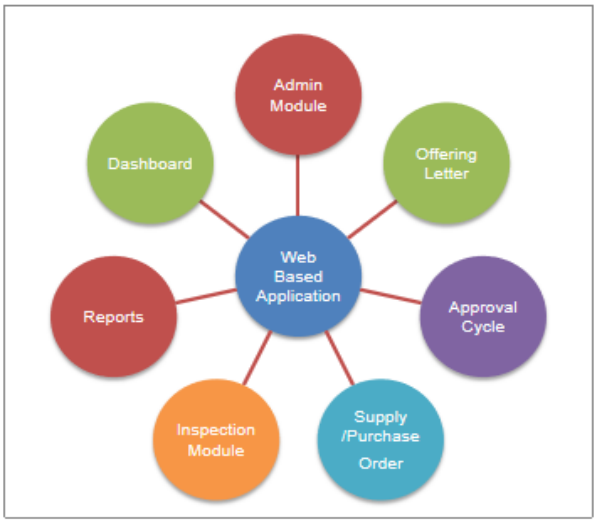

Figure 1 : WIQAS Modules

Work flow of SO/PO and OL

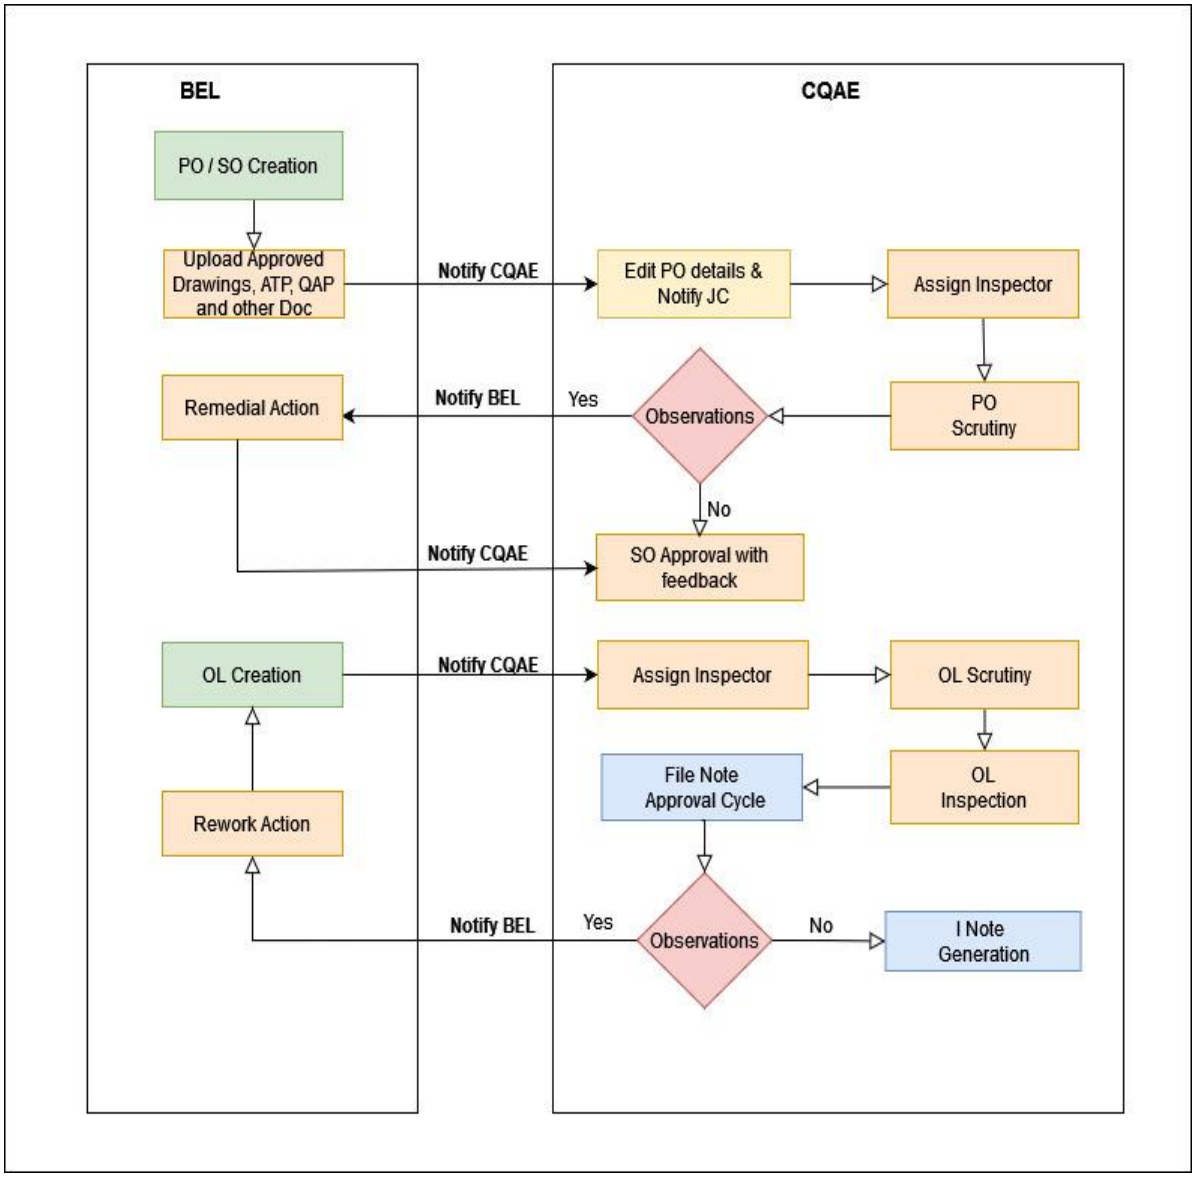

Figure 2: Overall Workflow

Stakeholders

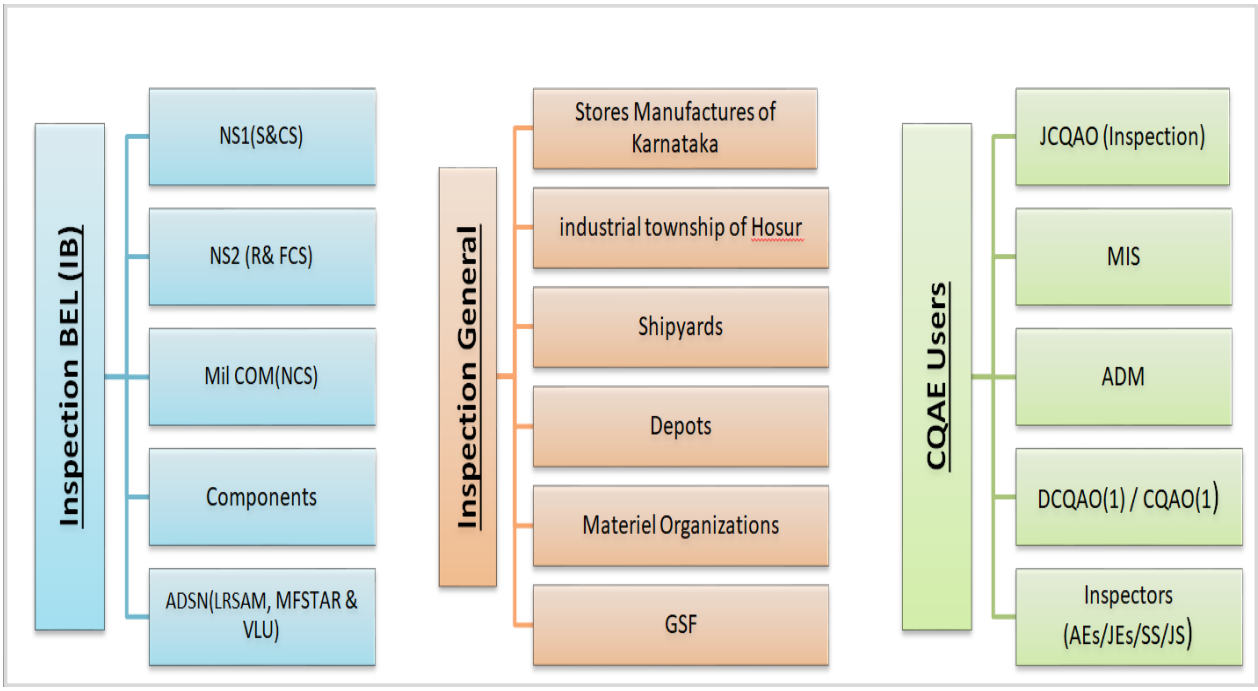

Figure 3: Organization Chart of WIQAS Software Users

Technology stack

- Web based UI with responsive & intuitive user-friendly User interface
- Micro service architecture
- Modular, Flexible and scalable solution architecture.
- Two level Authentication, Secured data transfer, Session Management, Idle user logout
- Seamless integration with source applications and other applications
- PostgreSQL Database

Deployment Architecture

3 User Roles

Sl. No.	User	Roles
1.	SBU Admin	SO/PO, OL creation and responses to CQAE queries
2.	Sales Admin	SO/PO creation and responses to CQAE queries
3.	QA Admin	OL creation and responses to CQAE queries
4.	CQAE Admin	SO/PO updation, I-Note generation and MIS activities
5.	Inspector	SO/PO Scrutiny, OL Scrutiny, OL Inspection, File Noting
6.	ACQAO	SO/PO Allotment, OL Allotment, Review and monitor progress
7.	DCQAO	SO/PO Allotment, OL Allotment, Review and monitor progress
8.	JCQAO	SO/PO Allotment, SO Approval, OL Allotment, Review and monitor progress
9.	CQAO	File Noting approval, Review and monitor progress

4 Use Cases

Sl. No.	Use Case	User Roles
1.	Login to the application	All
2.	Import SO/PO	SBU Admin
3.	Import Project Details	SBU Admin
4.	Import Line Items	SBU Admin
5.	Update SO/PO & Notify JC	CQAE Admin
6.	SO/PO Allotment	JCQAO/DCQAO/ACQAO
7.	SO/PO Scrutiny	Inspector
8.	First Contact Letter (FCL)	Inspector
9.	First Contact Meeting (FCM)	Inspector
10.	Import Offer Letter	SBU Admin
11.	Offer Letter Allotment	JCQAO/DCQAO/ACQAO
12.	OL Scrutiny	Inspector
13.	OL Inspection	Inspector
14.	Quality Improvement Note	Inspector/ SBU Admin
15.	Inspection File Note (File Noting)	Inspector
16.	File Noting Approval Cycle	ACQAO/DCQAO/JCQAO
17.	I-Note Generation	CQAE Admin

4.1 Login to the application

STEP 1: Enter Username and password and click on **"Submit"** button in the home page to login to the application. The login credentials are pre-shared with all the concerned users.

Figure 5: Login Page

4.2 Import SO/PO

STEP 2: After logging-in as SBU admin/ Sales admin, click on **"SO/PO Details"** in the left sidebar. Click on the **"IMPORT SO/PO"** button to import the SO/PO details from excel and SO/PO details is listed in the tabular format. The excel file shall be prepared in the shared format and same shall be used for the import activity.

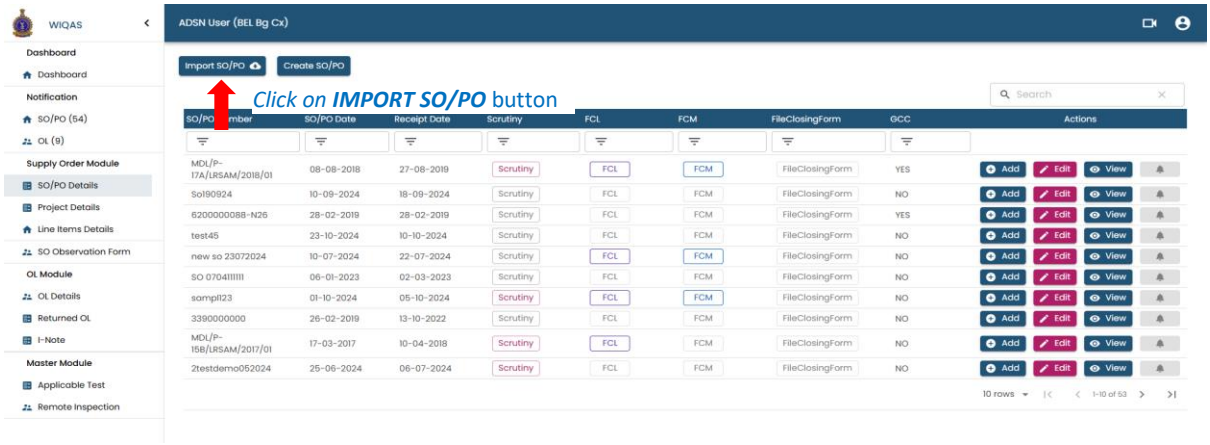

Figure 6: Import SO/PO

STEP 3: Click on the **"Browse"** button to select the valid excel file.

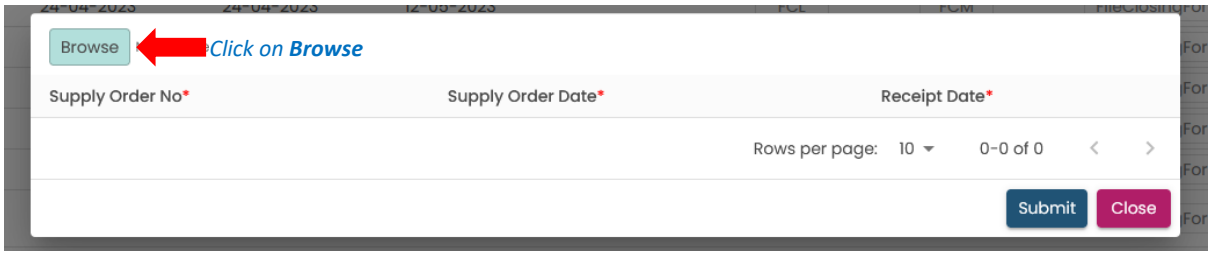

Figure 7: Browse excel file

STEP 4: Select the valid excel file and click on **"Open"** button.

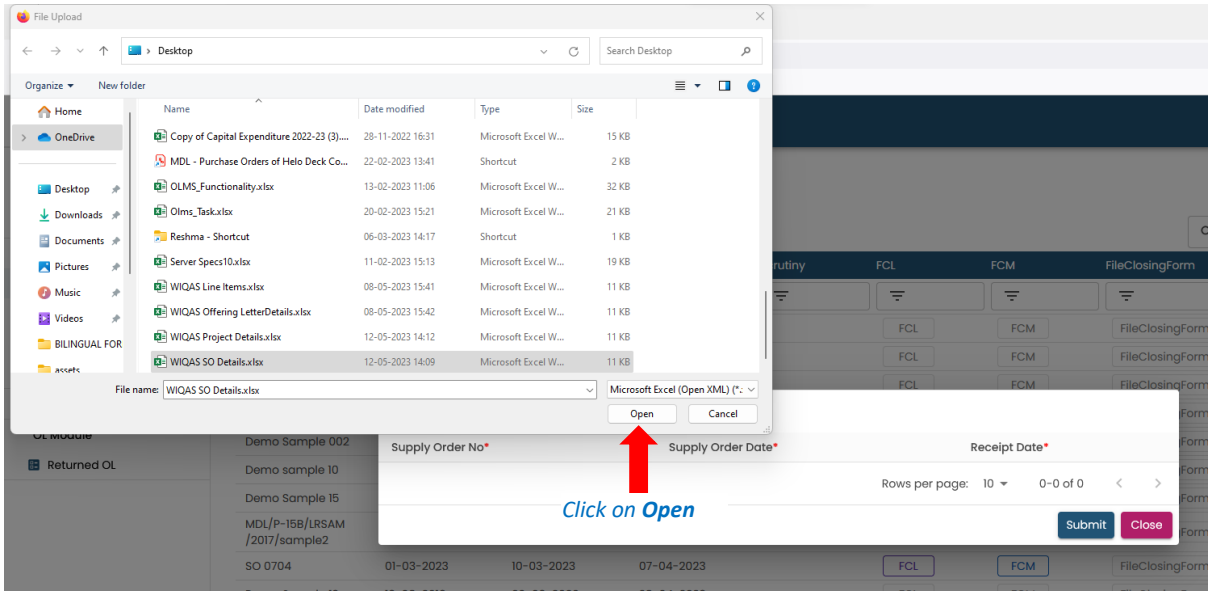

Figure 8: Select excel file

STEP 5: After selecting valid excel file, all the details in excel file is displayed in the dialog in tabular format. Now click on **"Submit"** button to save the details imported from excel.

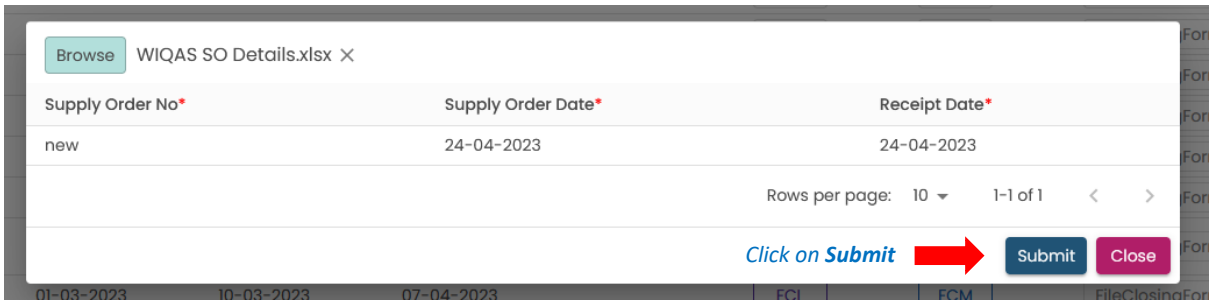

Figure 9: Submit Import Form

STEP 6: On successful submission **"Data Submit Successfully"** message will be displayed.

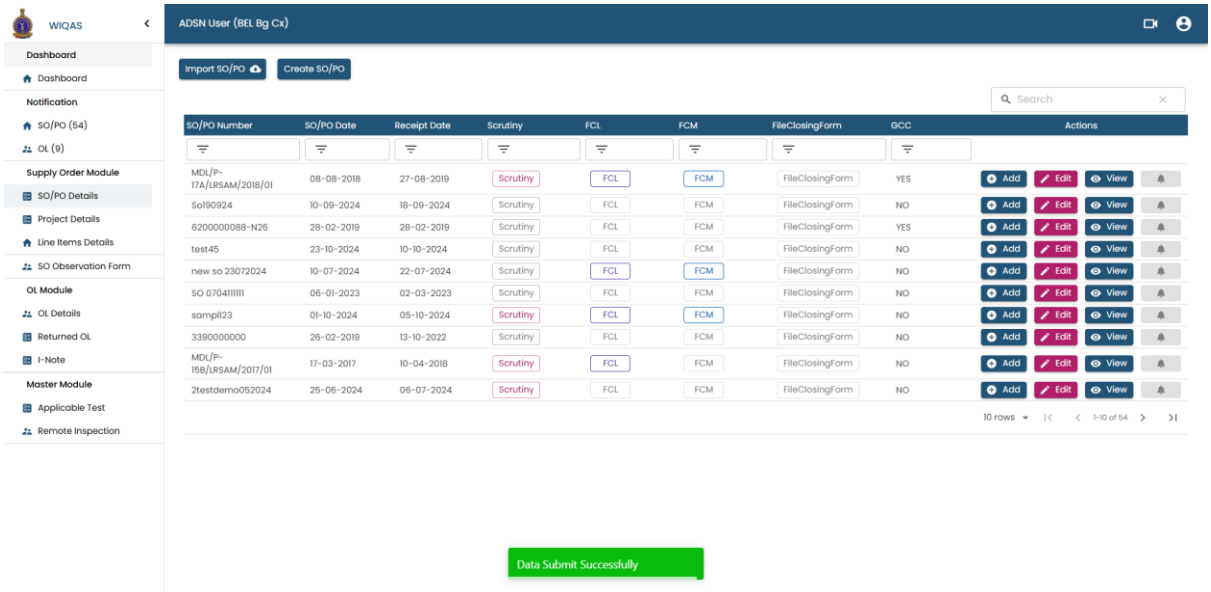

Figure 10: Display imported SO/PO

STEP 7: One more option to manually enter the **"SO/PO Details"** is by clicking on **"Create SO/PO"**.

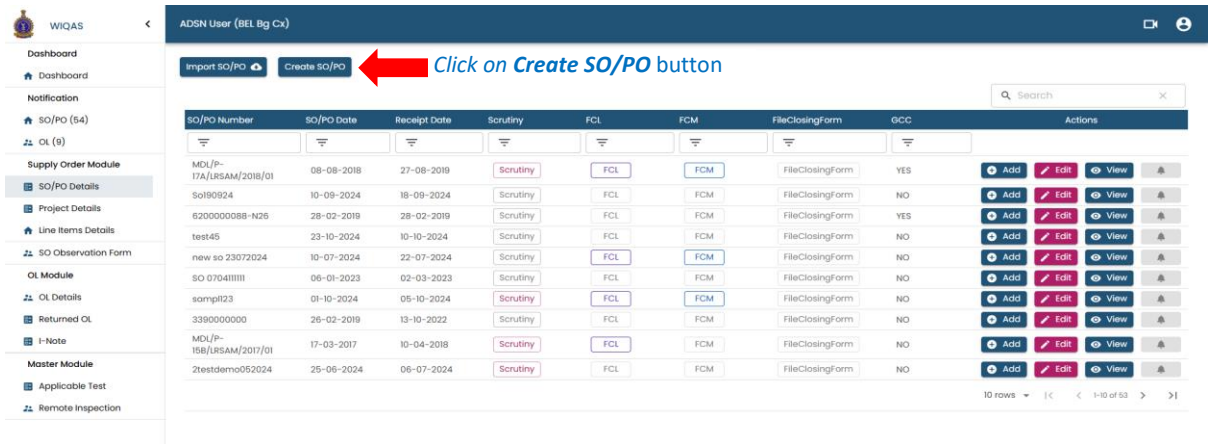

Figure 11: Create SO/PO

STEP 8: Enter the necessary details and click on **"Submit"** button

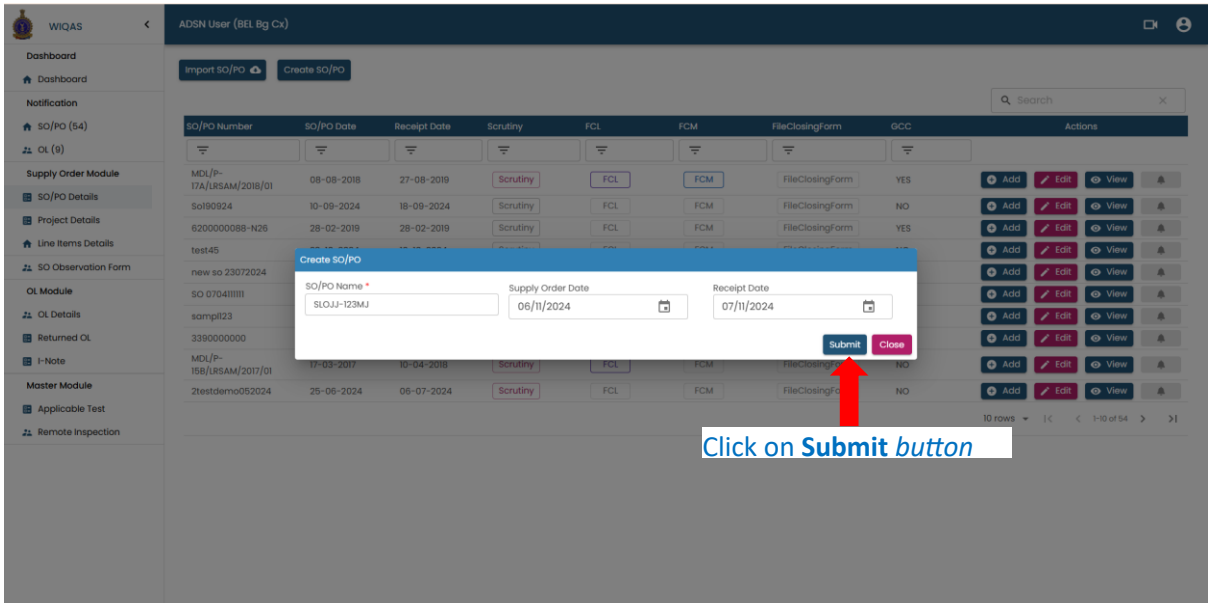

Figure 12: Submit SO/PO

STEP 9: On successful submission **"Data Submit Successfully"** message will be displayed.

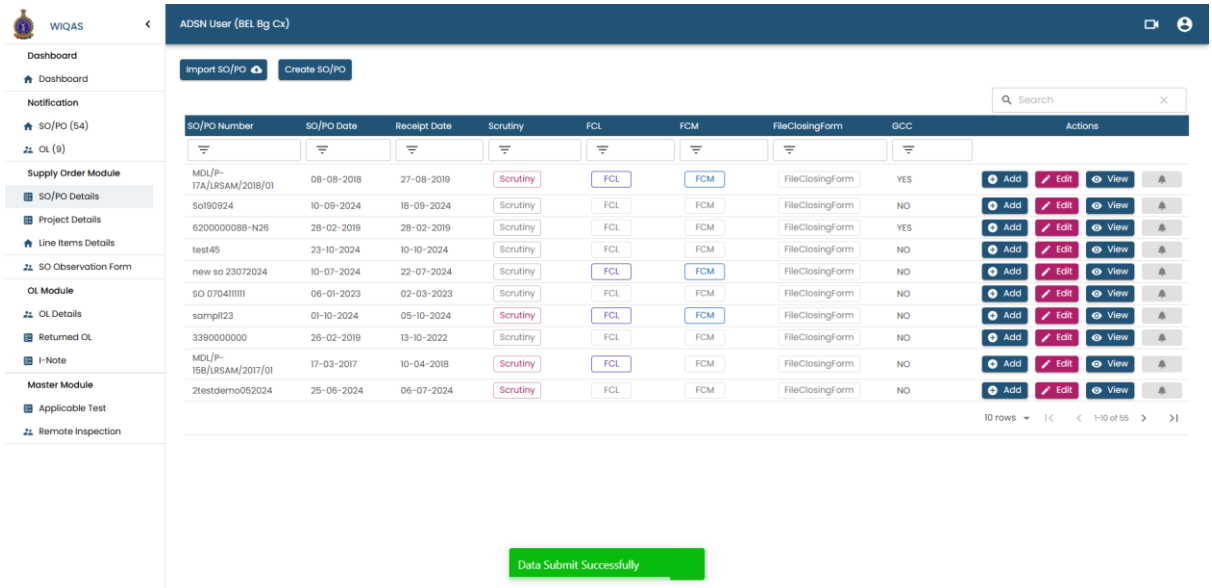

Figure 13: Display of created SO/PO

STEP 10: There is option to edit the added SO/PO details by clicking on **"Edit"** button.

Figure 14: Edit SO/PO

STEP 11: Update the necessary details and clicking on **"Update"** button.

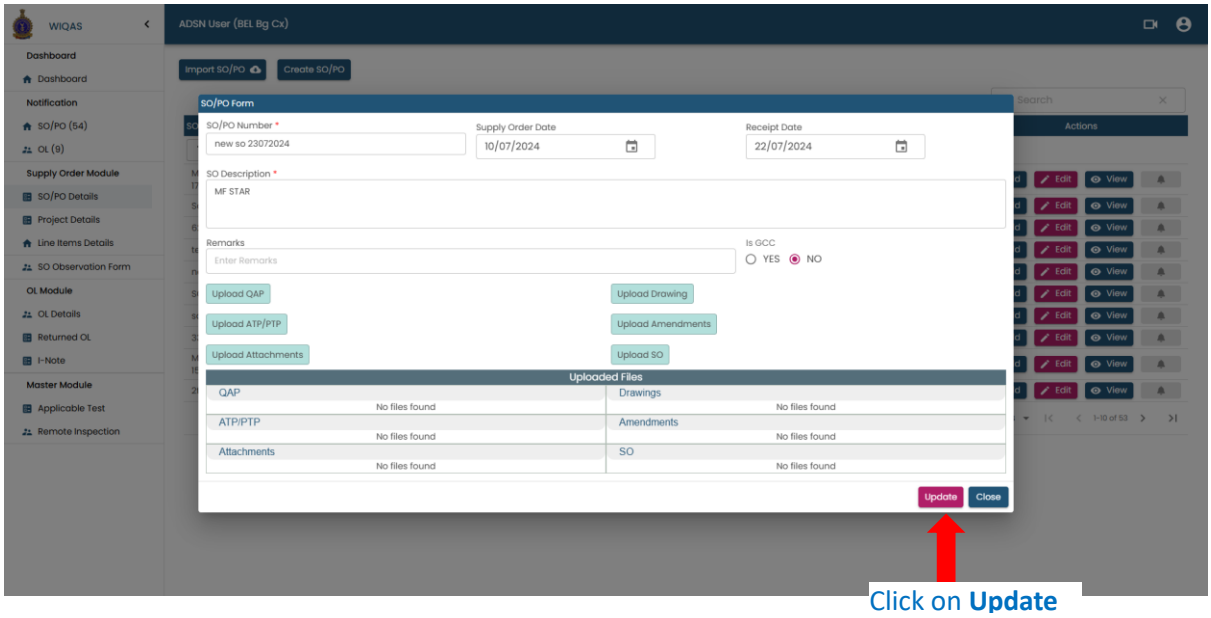

Figure 15: Update SO/PO

STEP 12: On successful submission **"SO details updated successfully"** message will be displayed.

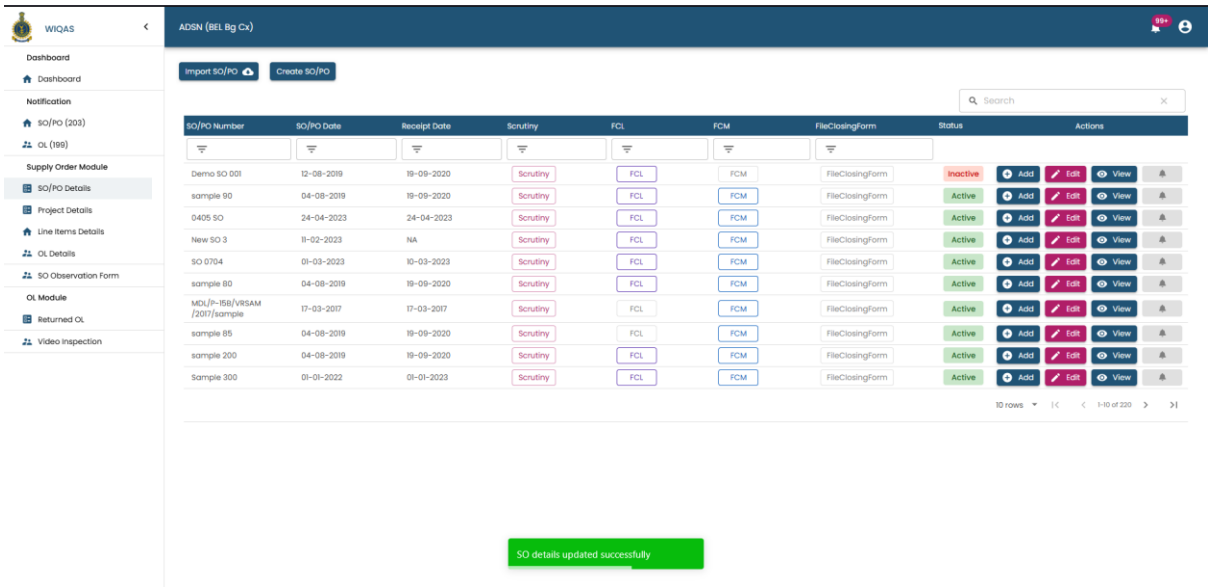

Figure 16: Table view of SO/PO

4.3 Import Project Details

STEP 13: Similarly click on **"Project Details"** menu in the left sidebar and click on the **"Import Project details"** button to import the Project details from excel. Now select the **"Supply Order"** from the drop-down for which project details must be imported. Browse the excel file with the project details. On successful submission **"Saved Successfully"** message will be displayed and data will be available in the tabular format.

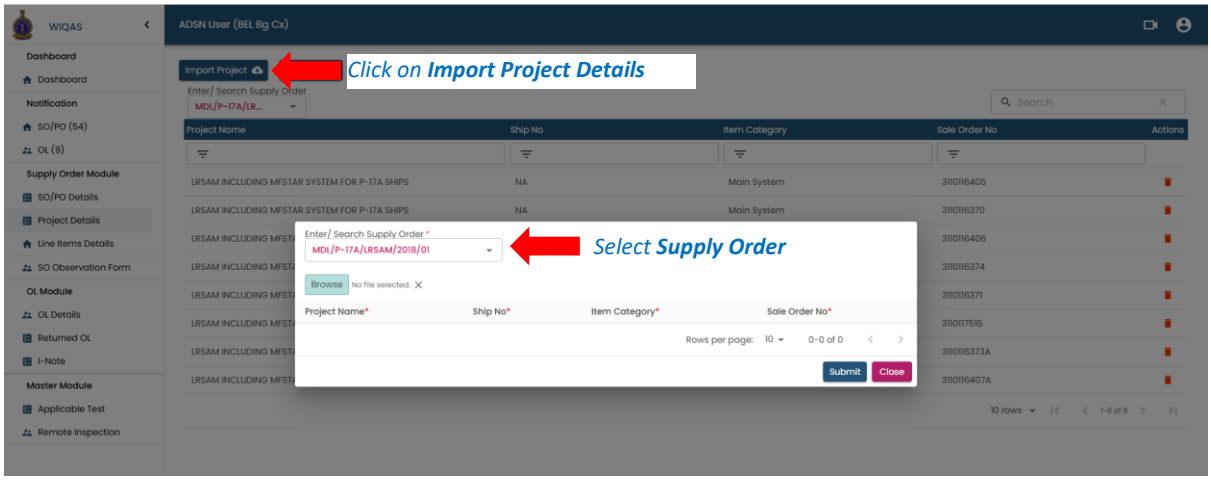

Figure 17: Import Project Details

STEP 14: One more option to manually enter the **"Project Details"** is by clicking on **"Add Project Details"**. Select the supply order from the dropdown and enter the relevant details. And to add row click on **"ADD Row"** and to **"DELETE Row"** click on delete icon. Click on **"Submit"** button. On successful submission **"Saved Successfully"** message will be displayed and data will be available in the tabular format.

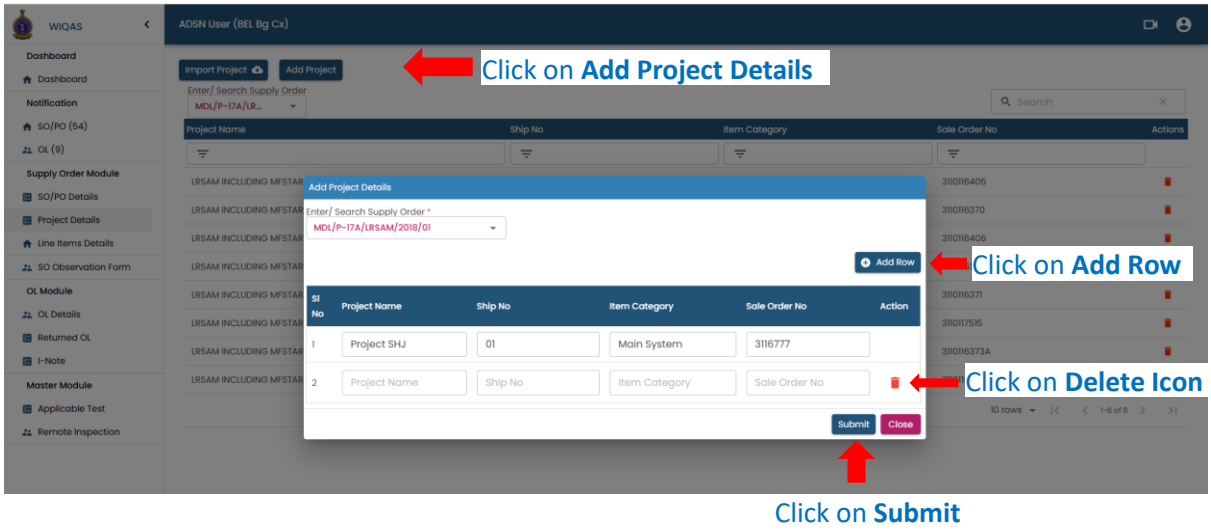

Figure 18: Add Project Details

STEP 15: To delete **"Project Details"**, click on the **"Delete"** icon.

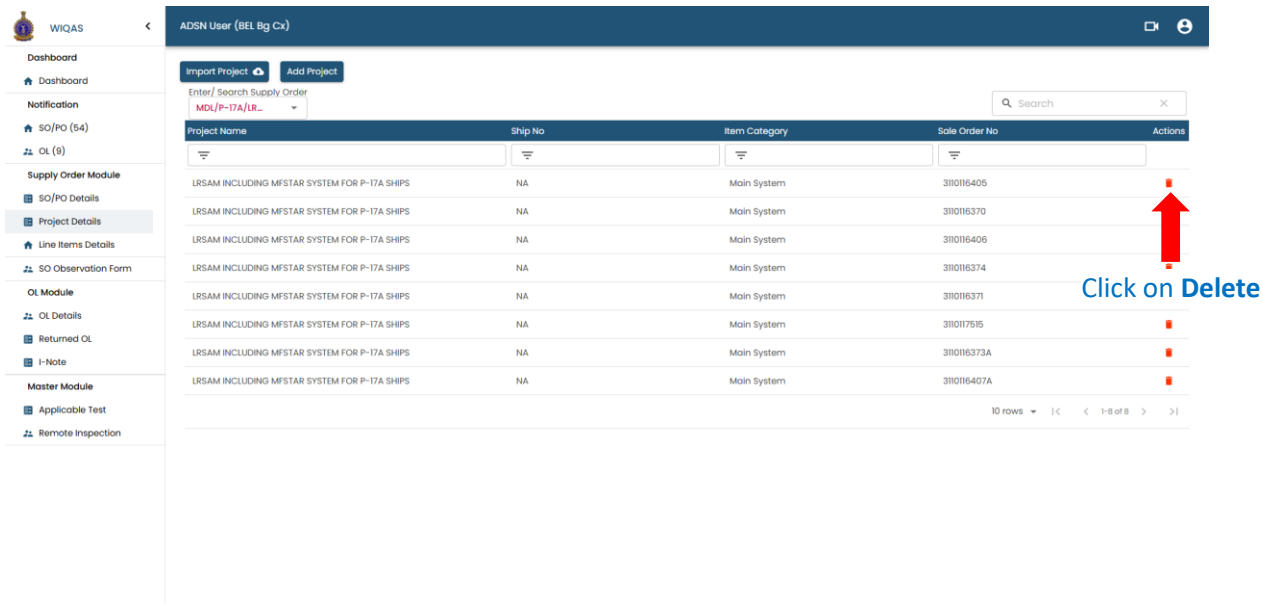

Figure 19: Delete Project Details

STEP 16: A confirmation dialog will be displayed to delete respective Sale Order. Click on **"Yes"** button and data will be deleted from the table.

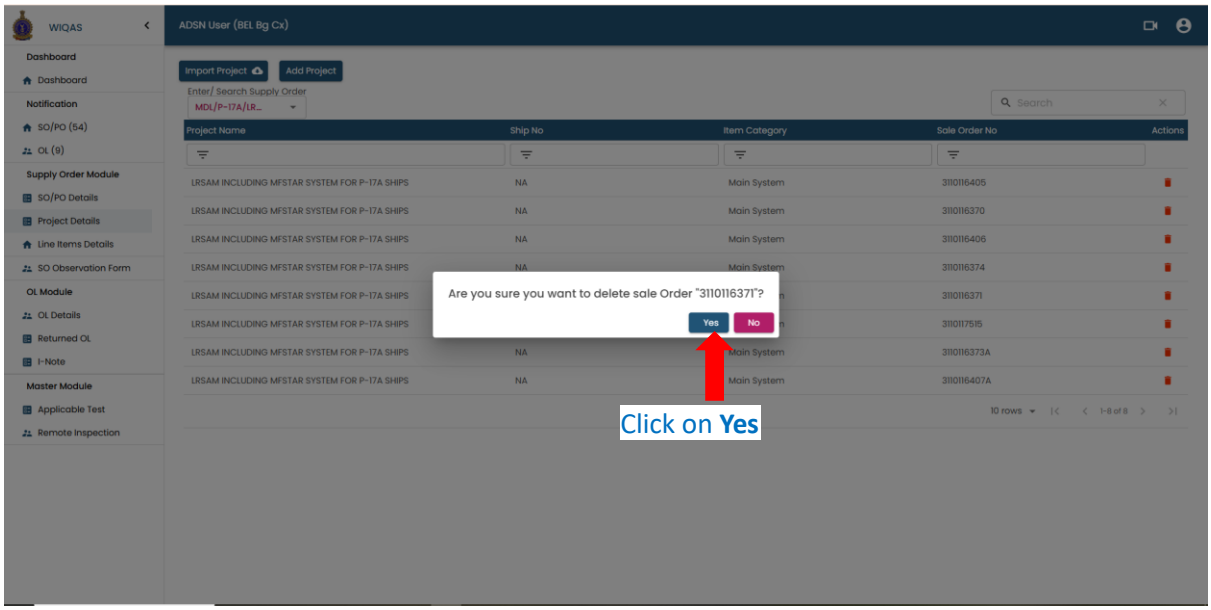

Figure 20: Confirmation of deletion

4.4 Import Line Items

STEP 17: Similarly click on **"Line Items Details"** menu in the left sidebar and click on the **"Import Line details"** button to import the Project details from excel. Now select the **"Supply Order"** for which Line Items details must be imported. Browse the excel file with the line-items details. On successful submission **"Saved Successfully"** message will be displayed and data will be available in the tabular format.

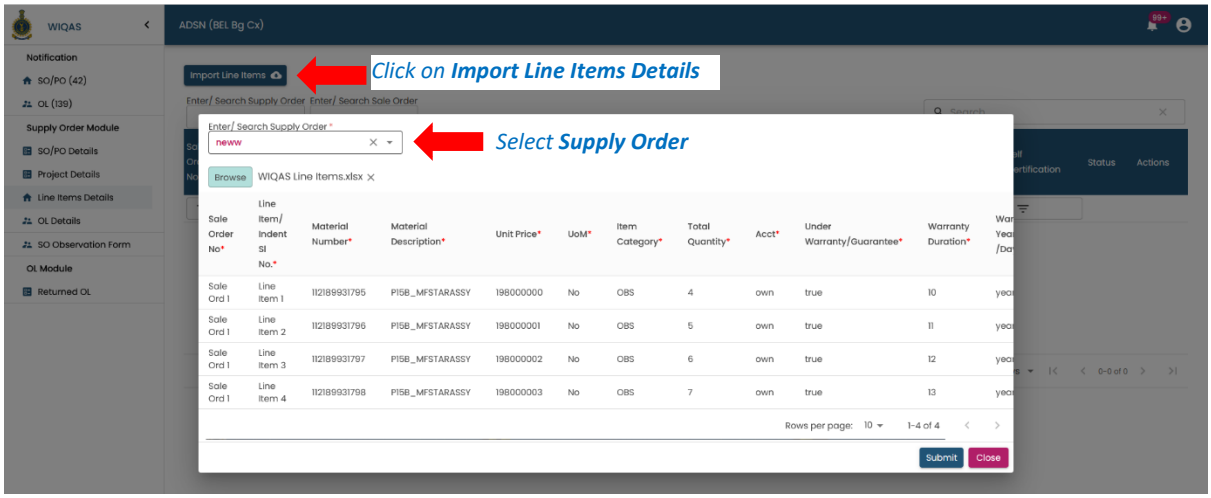

Figure 21: Selection of SO for Line-Items import

STEP 18: One more option to manually enter the **"Line Items Details"** is by clicking on **"Add Line Item Details"**. Select the supply order from the dropdown and enter the relevant details. Click on **"Submit"** button. On successful submission **"Saved Successfully"** message will be displayed and data will be available in the tabular format.

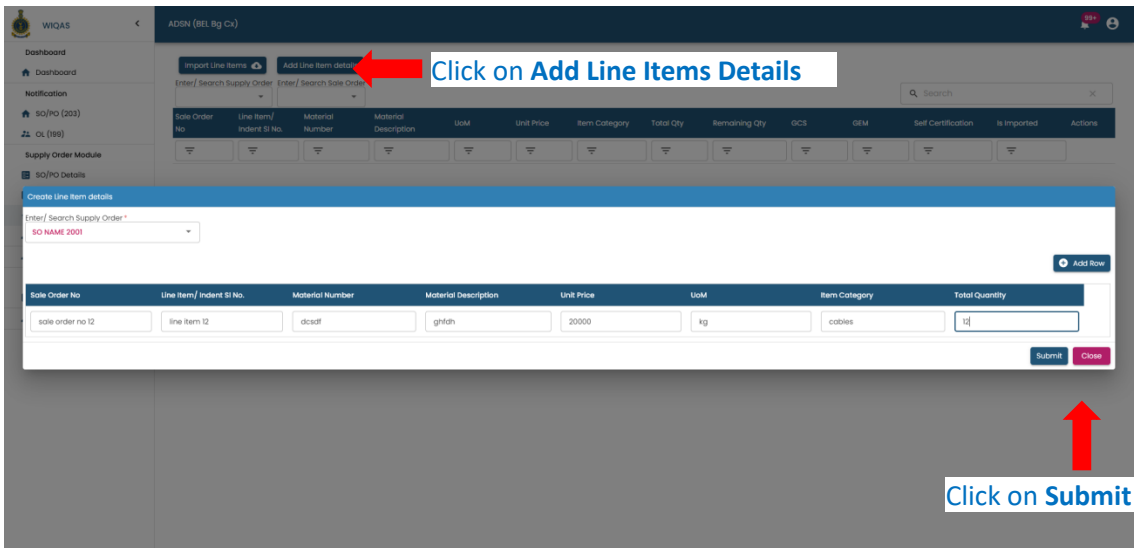

Figure 22: Add Line-Items

STEP 19: To edit **"Line Item Details"**, click on the **"Edit"** button and to delete line item click on **"Delete"** icon click

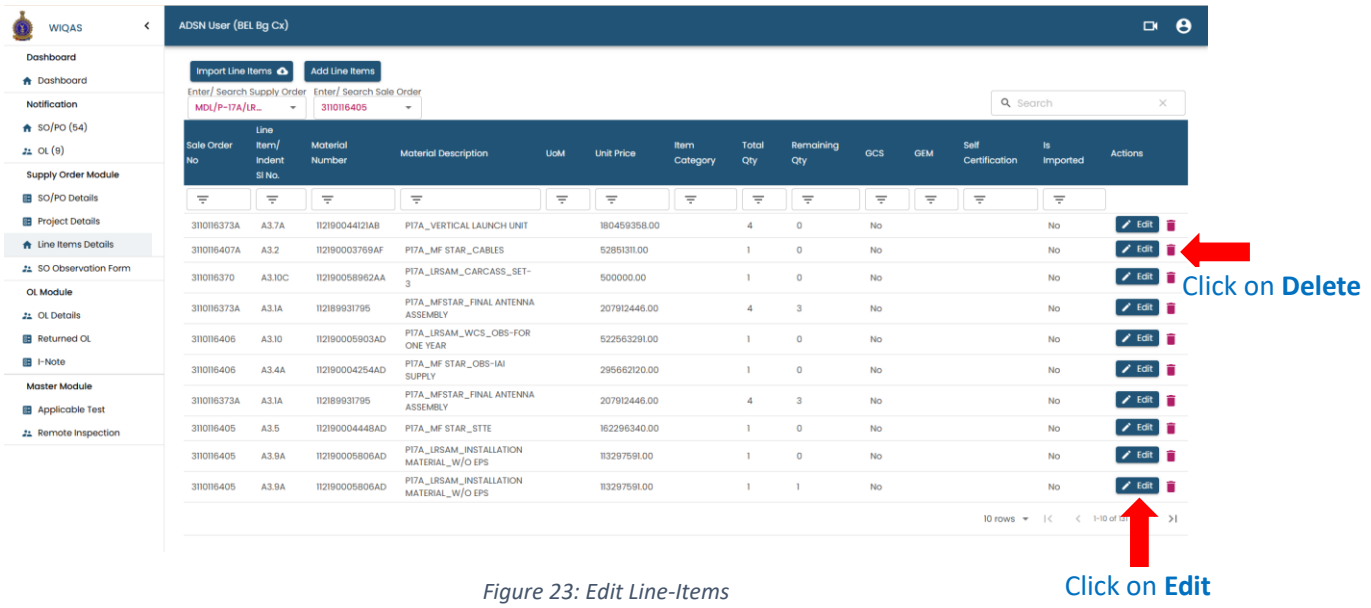

Figure 23: Edit Line-Items

STEP 20: Update the necessary details and click on **"Update"** button. On successful submission **"Saved Successfully"** message will be displayed and data will be available in the tabular format.

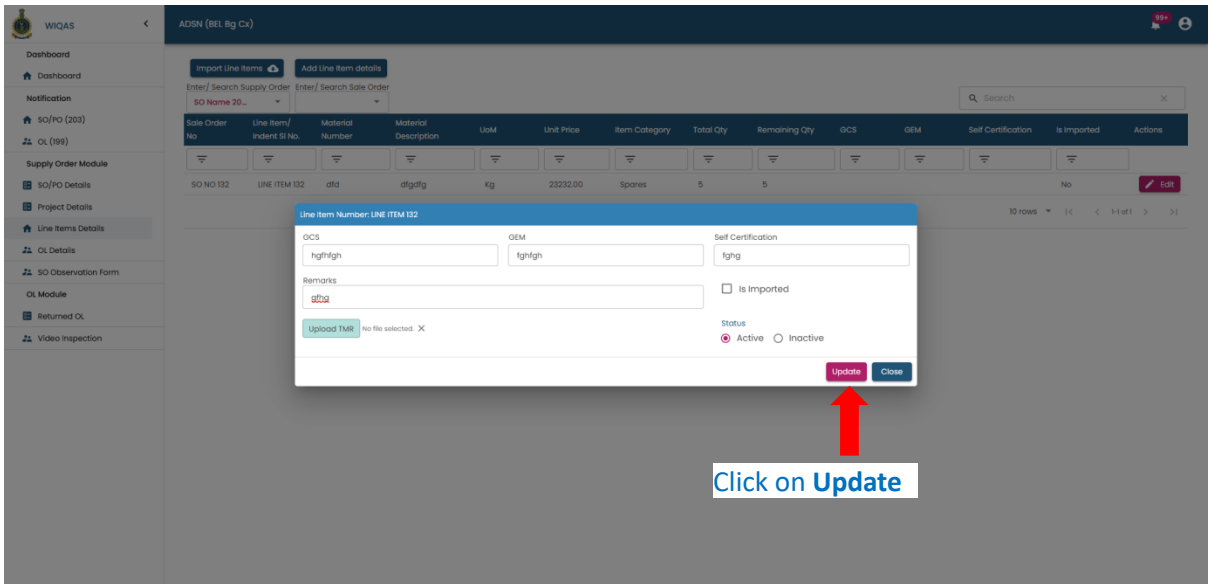

Figure 24: Update Line-Items

4.5 Update SO/PO & Notify JC

STEP 21: After Line Items are imported from the valid excel go to home page, enter username and password to login as **"CQAE Admin"**. After successful login, SO/PO is listed in the tabular format. Click on **"Edit"** button to update the necessary details. After filling all the necessary details click on **"Submit"** button to save the entered details. Once SO/PO has been updated it needs to be notified to JCQAO for further allotment and scrutiny process. To notify, click on **"Notify JC"** button to send notification to JCQAO about SO/PO details.

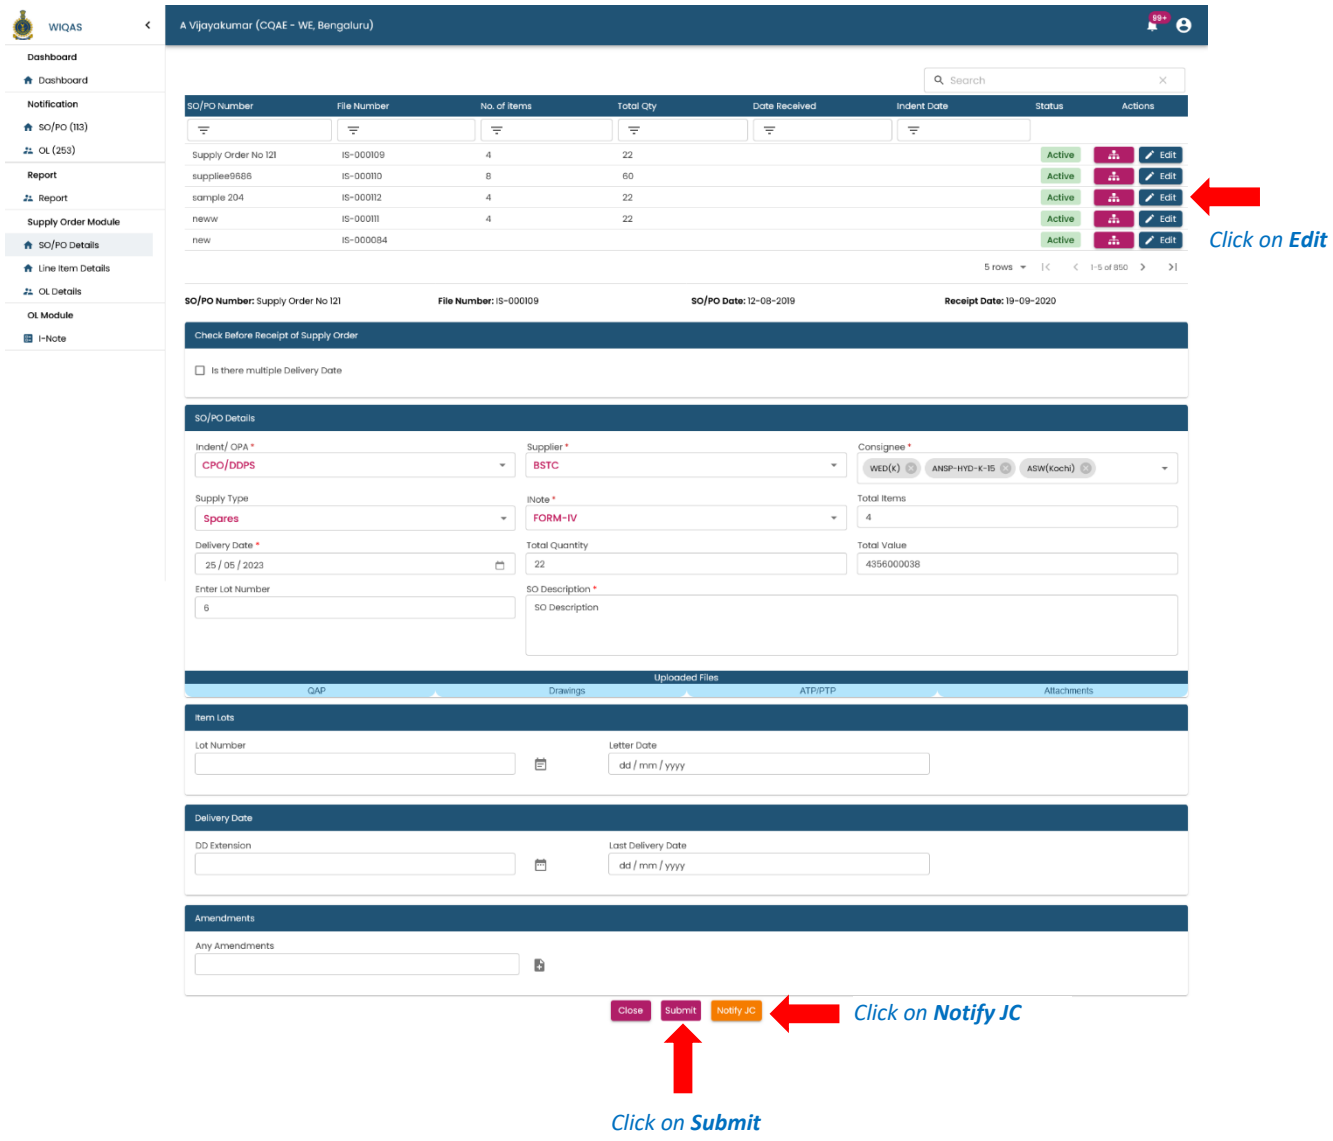

Figure 25: SO/PO update by CQAE Admin

4.6 SO/PO Allotment

STEP 22: In JCQAO login, after receiving notification of SO/PO from CQAE admin, JCQAO admin will proceed with allotting SO to desired Officer/Inspector. To allot the SO/PO, click on **"SO/PO Allot"** in the left sidebar. All the notified SO/PO shall be listed in the tabular format. Click on **"Allot"** button from the desired row. All the subordinate officers and Inspectors shall be listed in the drop-down. SO/PO can be allotted to the DCQAO/ACQAO/Inspector. A notification shall go to the Officer/Inspector upon allotment and Officer can further allot the SO to the Inspector.

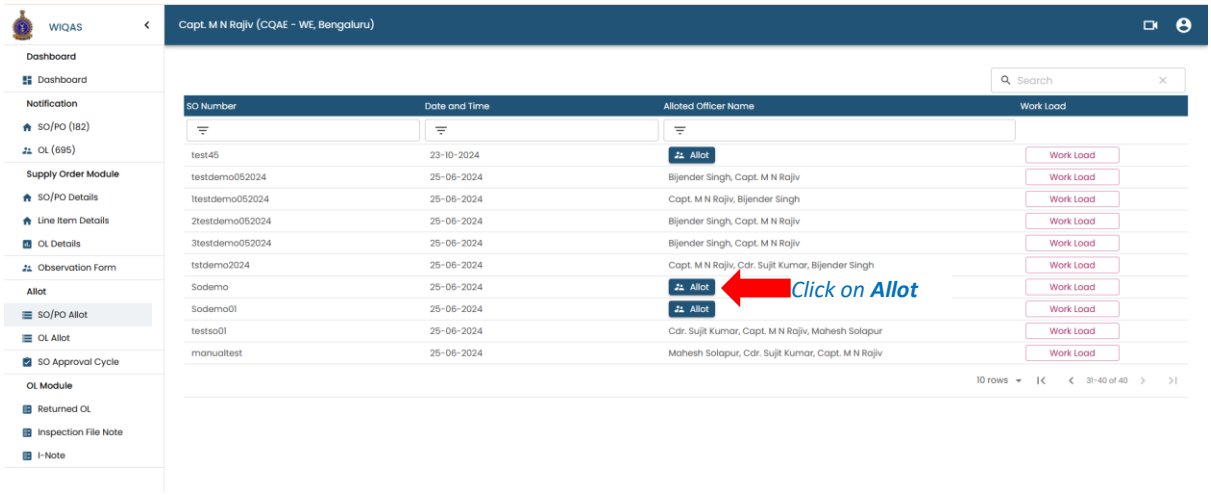

Figure 26: SO Allotment

STEP 23: Select the subordinate from the dropdown to allot SO and click on **"Allot"** button to allot the selected subordinate.

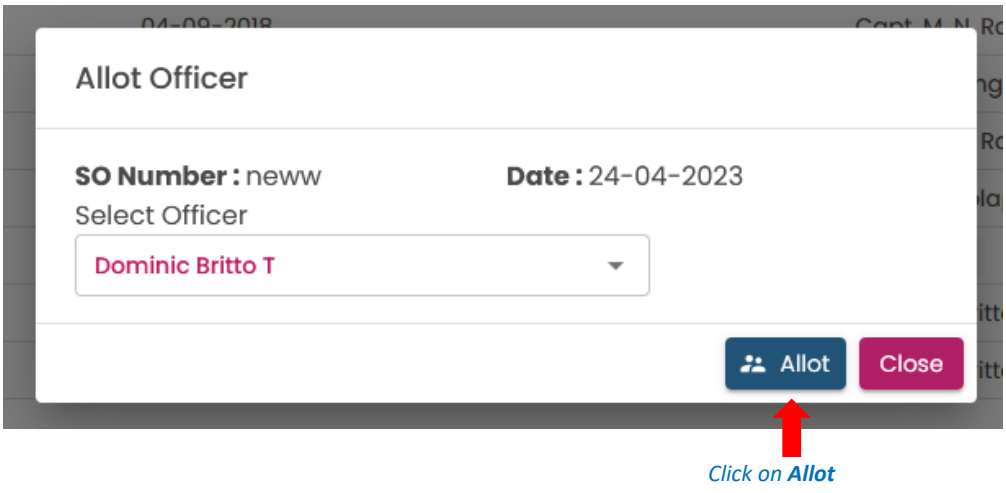

Figure 27: Selection of Officer/Inspector for SO/PO Allotment

4.7 SO/PO Scrutiny

STEP 24: Once after the allocation of SO to respective Inspector then the Inspector will proceed to inspect SO (**"Scrutiny"**, **"FCL"** and **"FCM"**).

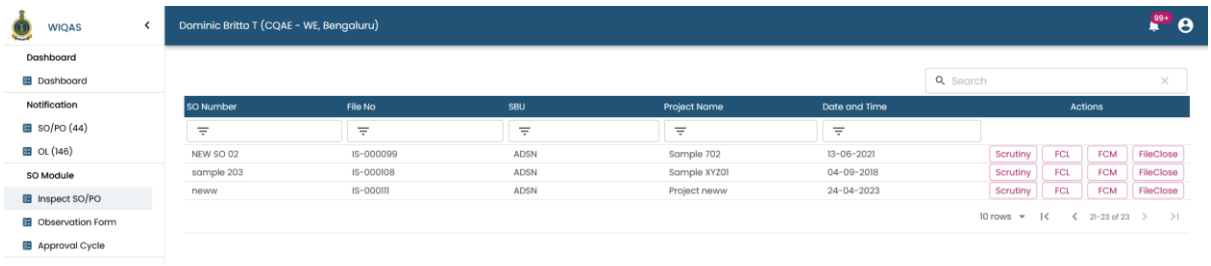

Figure 28: SO options for Inspector

STEP 25: Click on **"Scrutiny"** button, Inspector will write down the Observation and remarks to perform scrutiny of SO. There are two options to save the observations they are **"Save draft"** and **"Submit"**. On click of save draft button, it will save as draft and inspector can edit any number of times. Whereas on click of submit, it will save at once and he cannot edit any further. The inspector can preview and take the print out of the same.

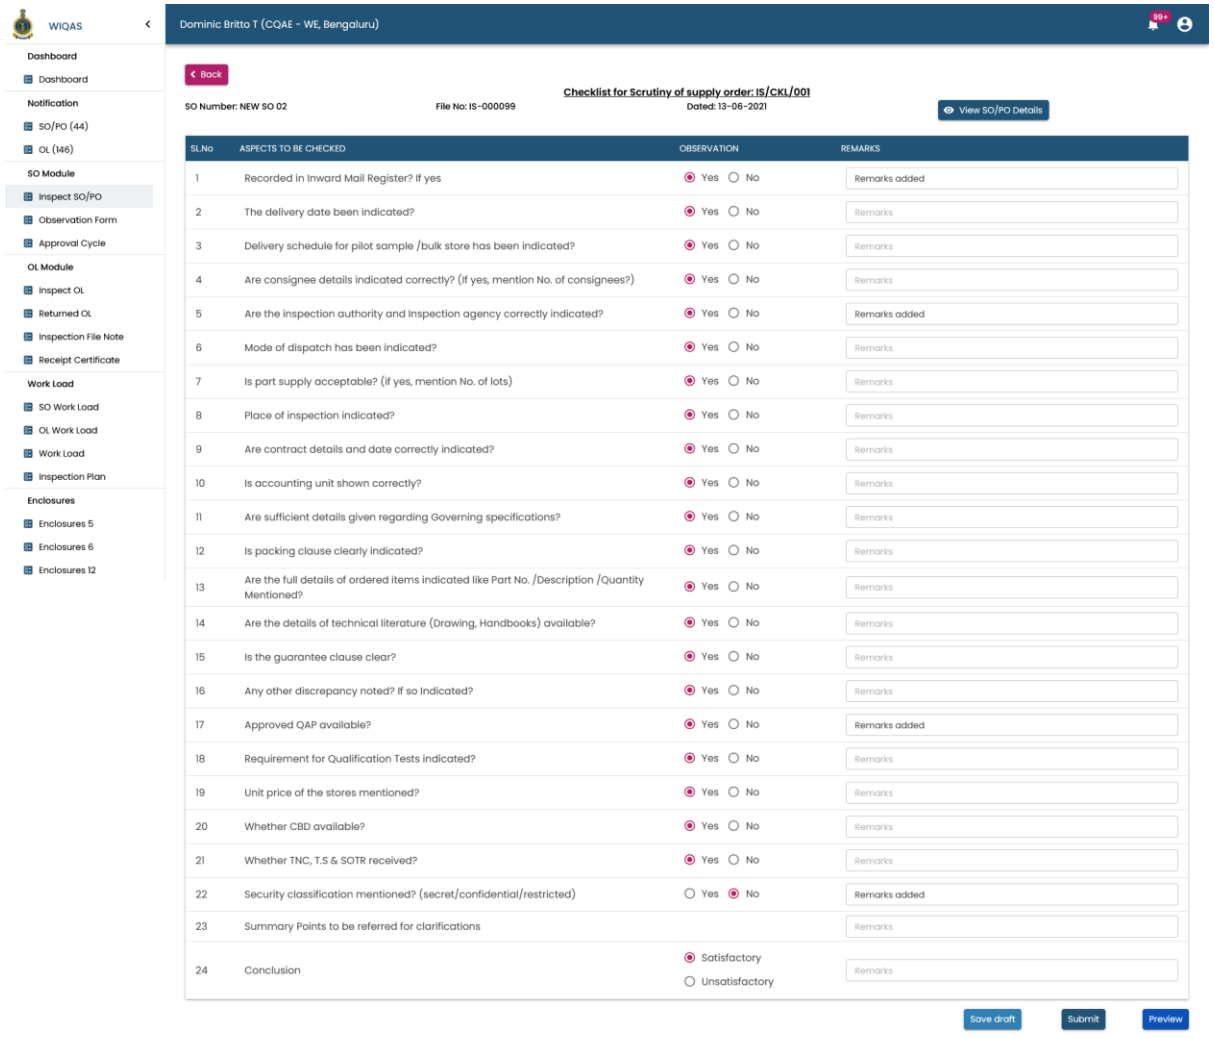

Figure 29: SO/PO Scrutiny

STEP 26: Once after the Scrutiny is performed by the inspector, Observation Form will be automatically generated to SBU admin. The observation form is filled by the SBU admin initially to address the scrutiny observations by writing down the remedial action.

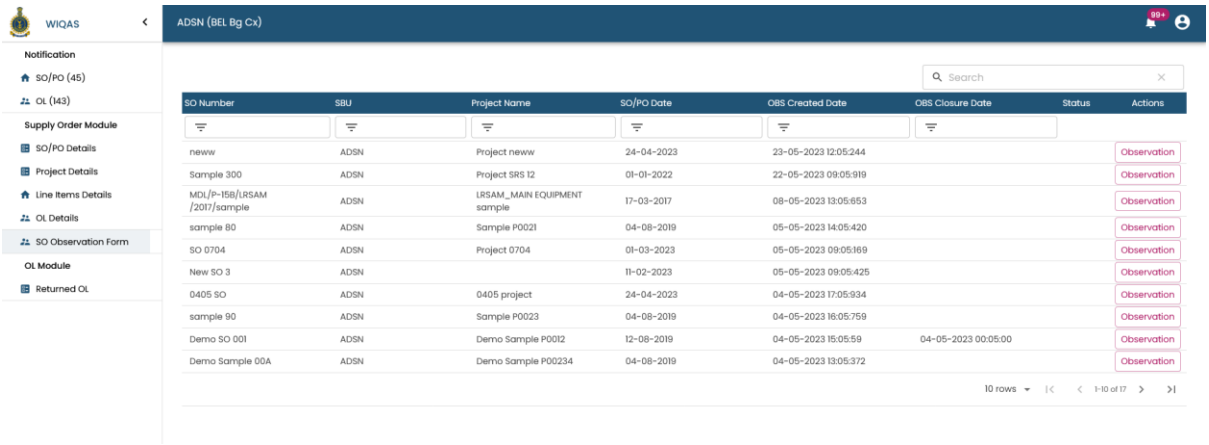

Figure 30: Observation Form viewing at SBU Admin

STEP 27: SBU admin will write down the remedial actions. There are two options to save the remarks they are **"Save draft"** and **"Submit"**. On click of save draft button, it will save as draft and inspector can edit any number of times. Whereas on click of submit, it will save at once and he cannot edit any further. The inspector can preview and take the print out of the same.

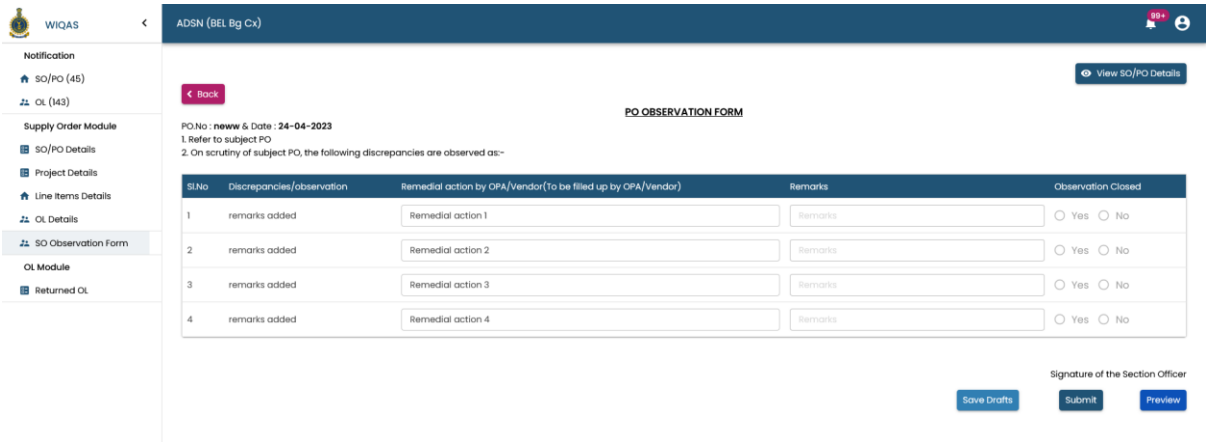

Figure 31: Remedial action on Observation points

STEP 28: After successful submission of remedial actions by SBU Admin, the observation form will be automatically generated for the inspector. Now inspector will fill the remarks and closes the observation. In case the observation is not closed the process will be repeated. Once after all the observations are closed, the inspector can preview and print the observation form.

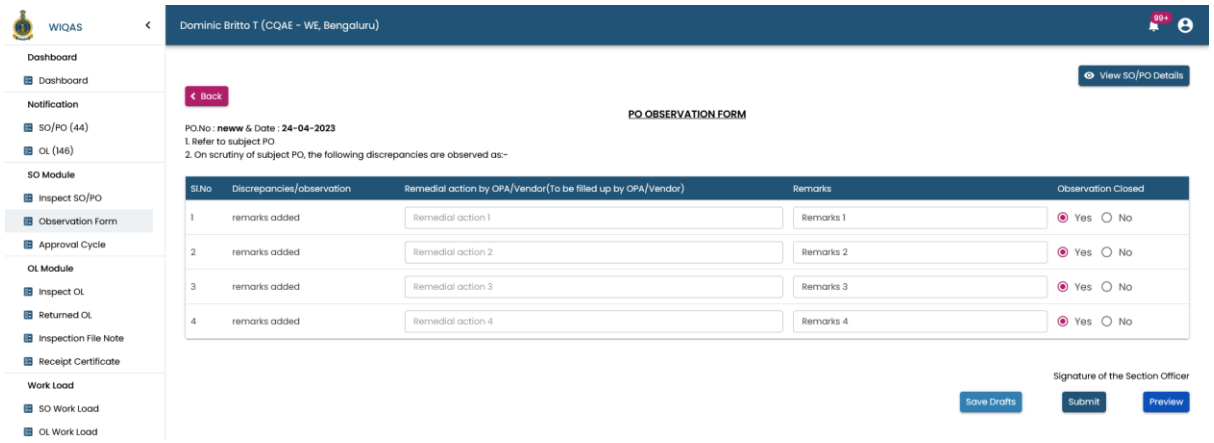

Figure 32: SO Observation closure

STEP 29: After Observation form process is completed the inspector will take up SO approval cycle.

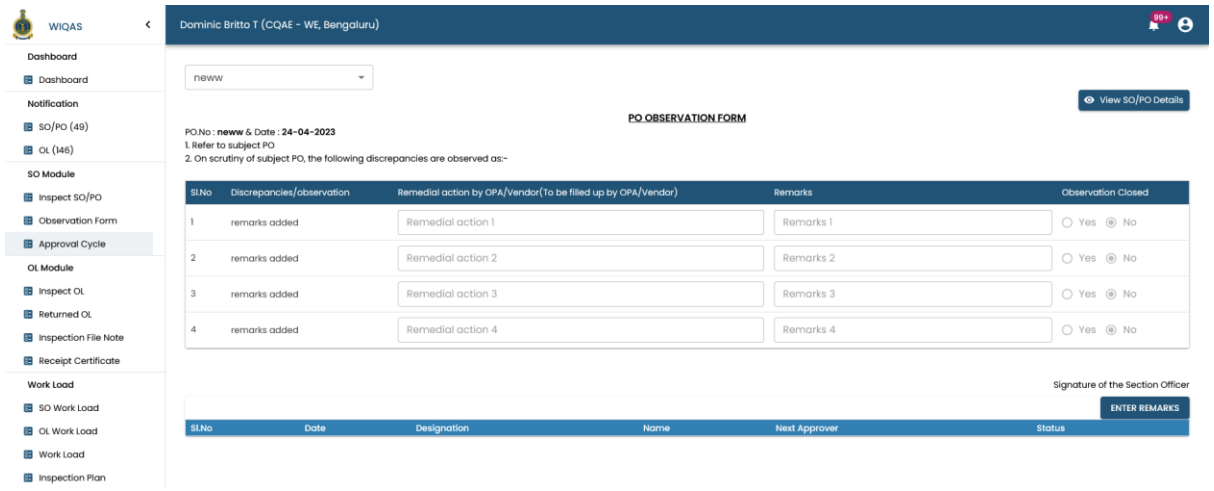

Figure 33: SO/PO Approval Cycle Initiation

STEP 30: The inspector will enter the remarks and select the next approver from the dropdown and submits.

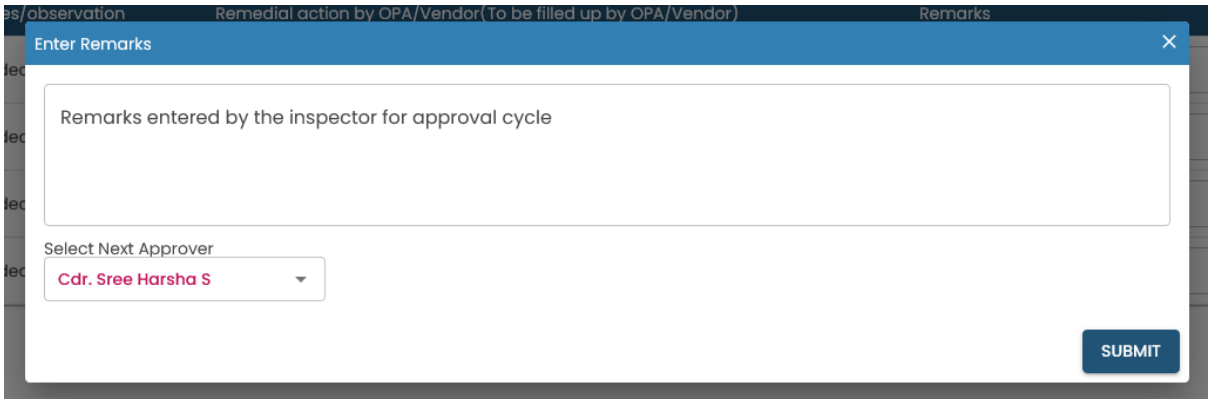

Figure 34: Selection of approver for SO/PO approval

STEP 31: The remarks entered by the inspector will be displayed in the tabular form to the approver.

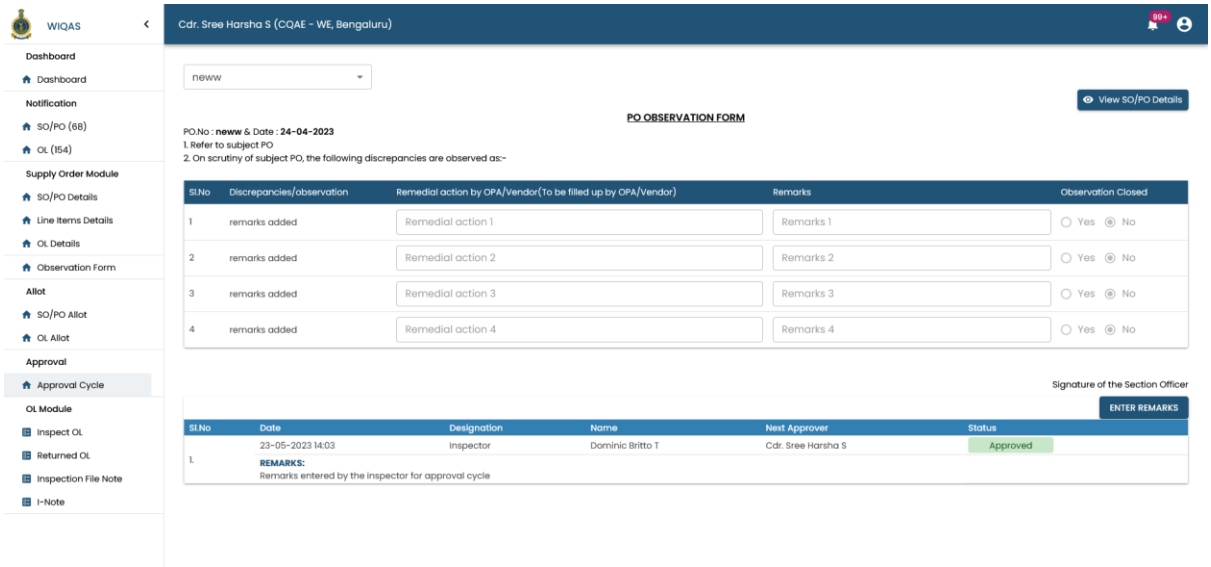

Figure 35: Viewing remarks of SO/PO approval

STEP 32: Now the approver either accepts or rejects the remarks entered by the inspector and writes his remarks for the same. If he accepts then next approvers will be his higher officers in the hierarchy and if he rejects then the next approvers will be his lower officers in the hierarchy.

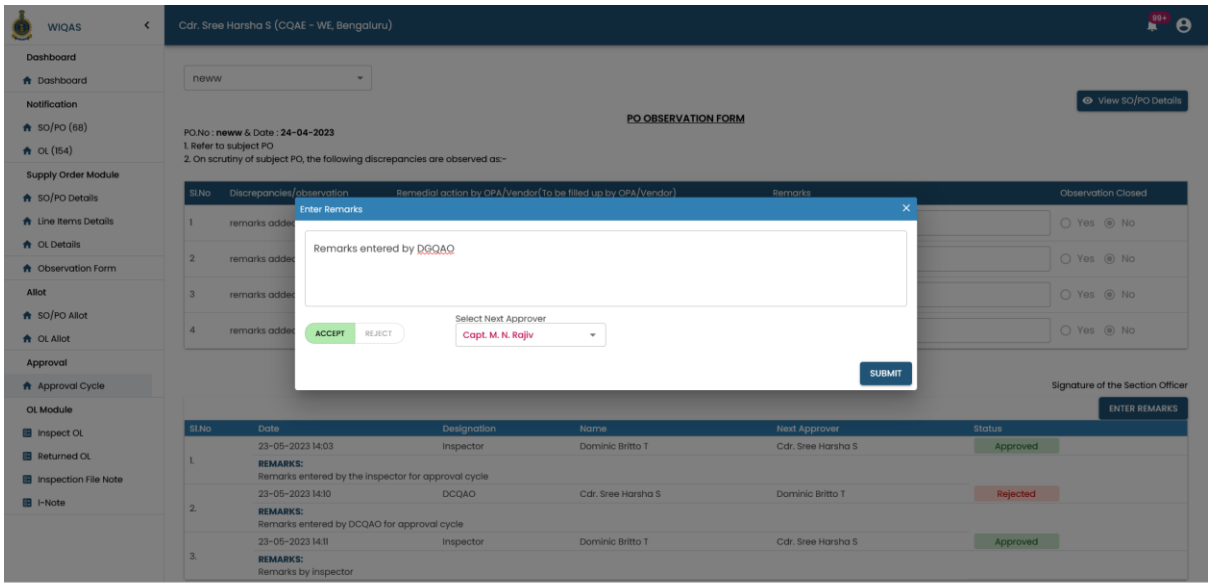

Figure 36: SO/PO approval remarks by approver

STEP 33: Similarly, the remarks will be sent till JCQAO level and at last JCQAO will accept and completed the approval cycle.

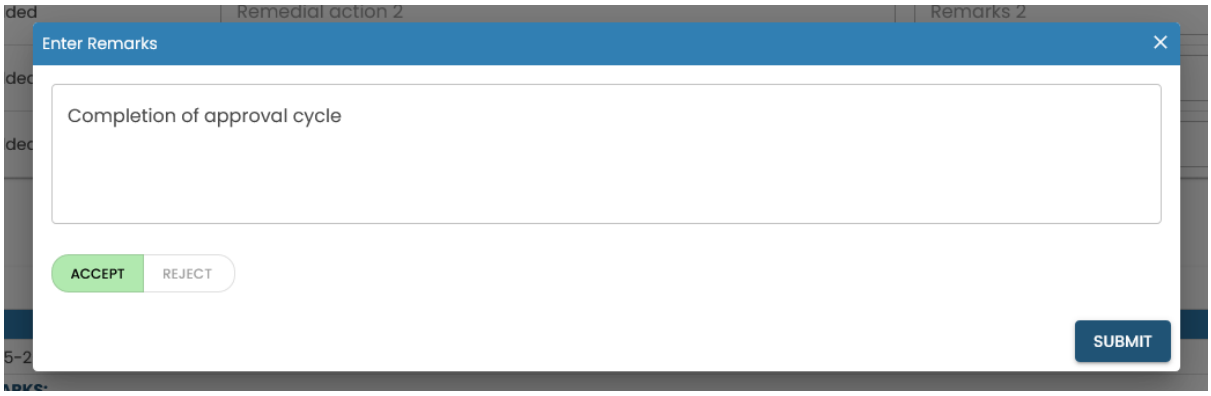

Figure 37: SO/PO Final approval by JCQAO

4.8 First Contact Letter (FCL)

STEP 34: Similarly click on **"FCL"** button, Inspector will add remarks. There are two options to save the remarks they are **"Save draft"** and **"Submit"**. On click of save draft button, it will save as draft and inspector can edit any number of times. Whereas on click of submit, it will save at once and he cannot edit any further. The inspector can preview and take the print out of the same.

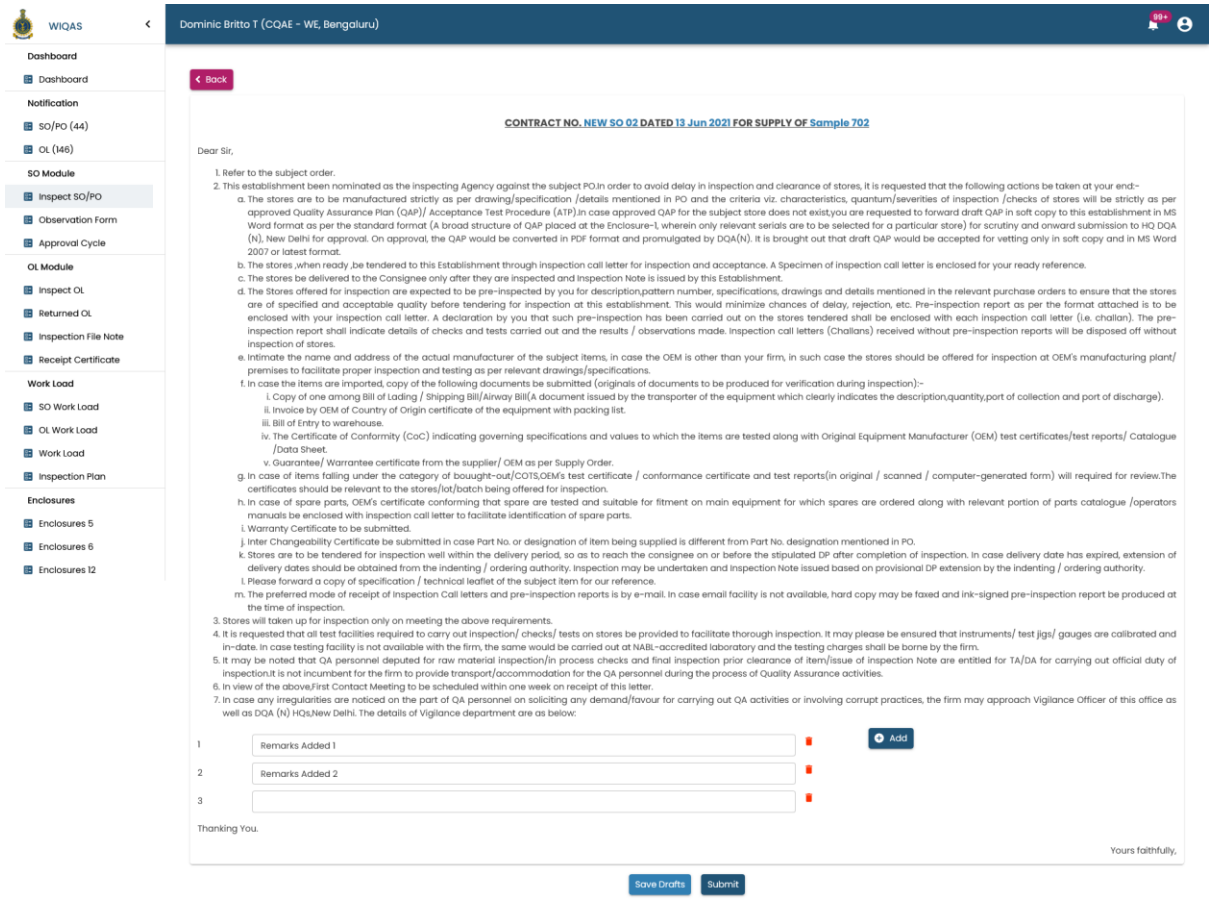

Figure 38: FCL

4.9 First Contact Meeting (FCM)

STEP 35: Similarly click on **"FCM"** button, Inspector will add remarks. There are two options to save the remarks they are **"Save draft"** and **"Submit"**. On click of save draft button, it will save as draft and inspector can edit any number of times. Whereas on click of submit, it will save at once and he cannot edit any further. The inspector can preview and take the print out of the same.

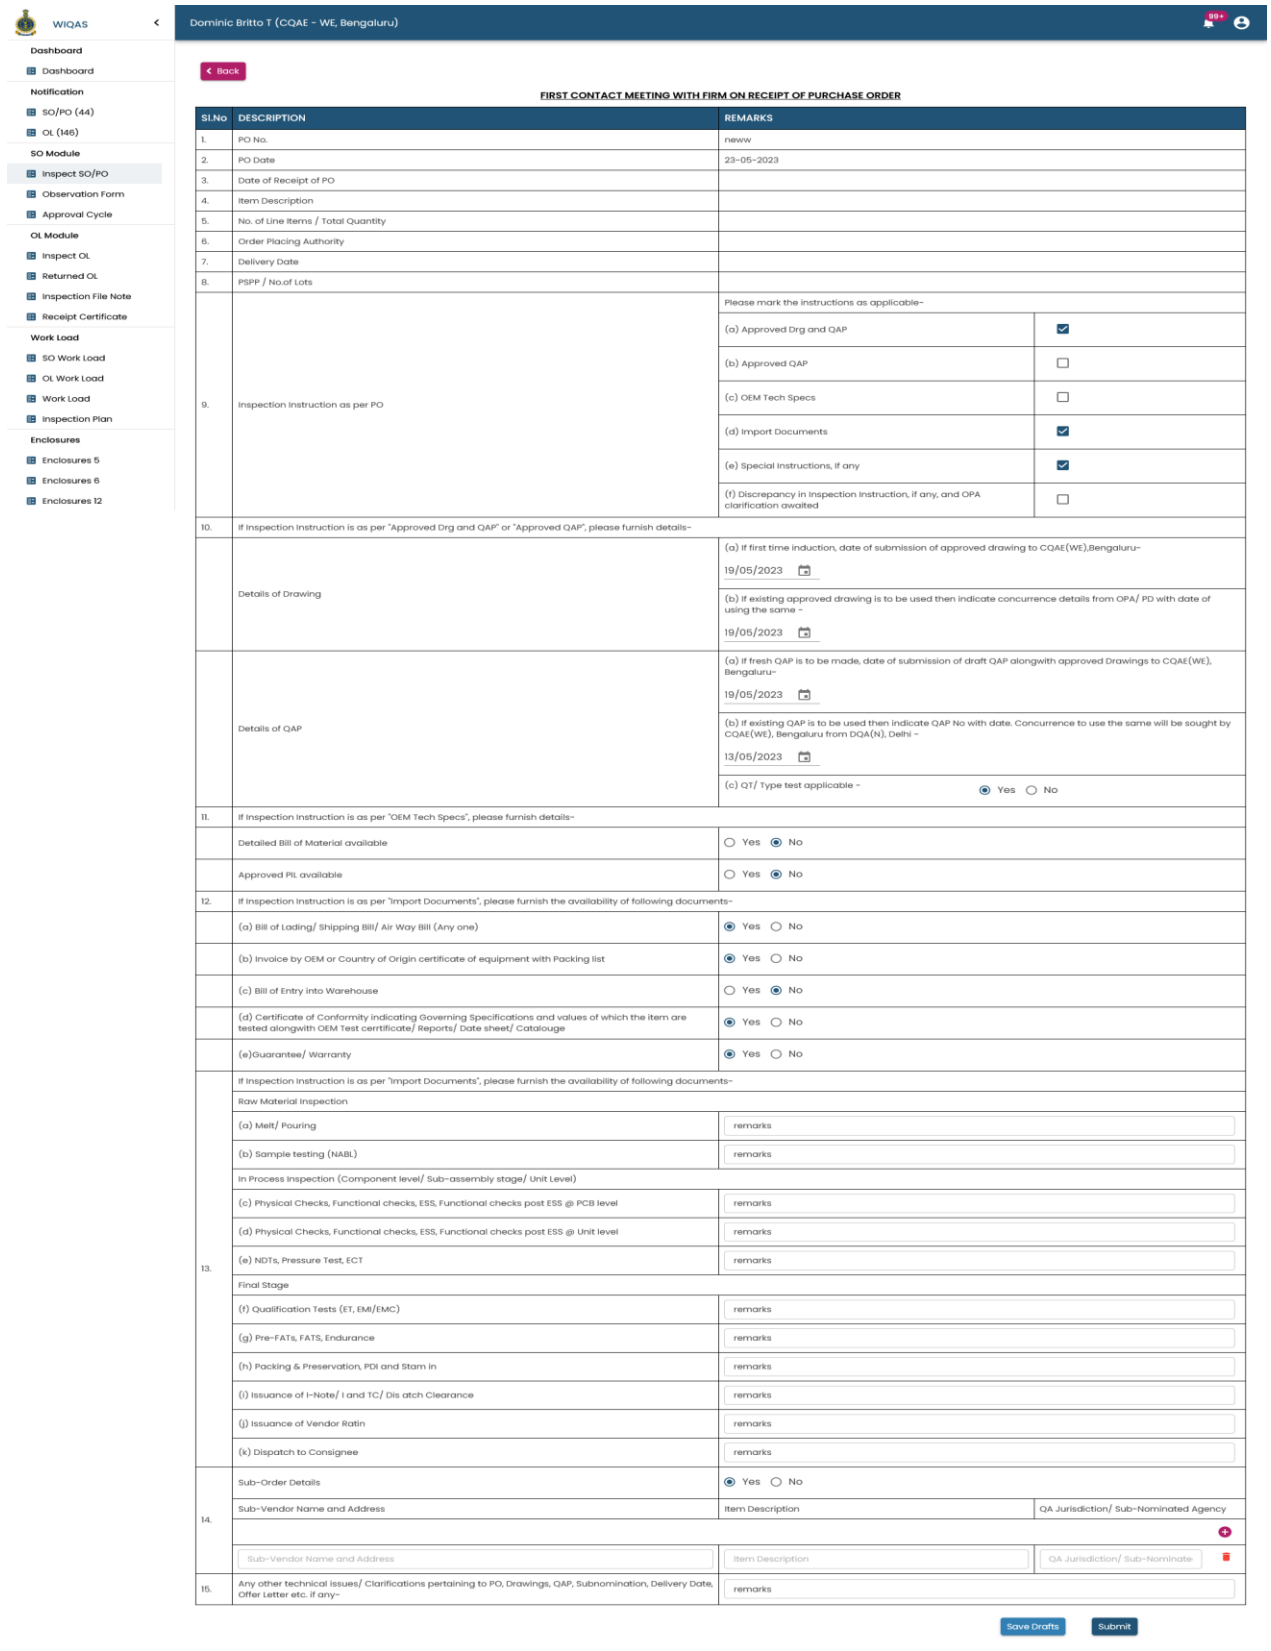

Figure 39: FCM

4.10 Import Offer Letter

STEP 36: Login as SBU admin/ QA admin. Similarly click on the **"Import OL details"** button to import the OL details from excel. Now select the **"Supply Order"**, **"Sale Order"**, **"Consignee"** and **"Level of Inspection"** for which OL details have to be imported. On successful submission **"Saved Successfully"** message will be displayed and data will be available in the tabular format.

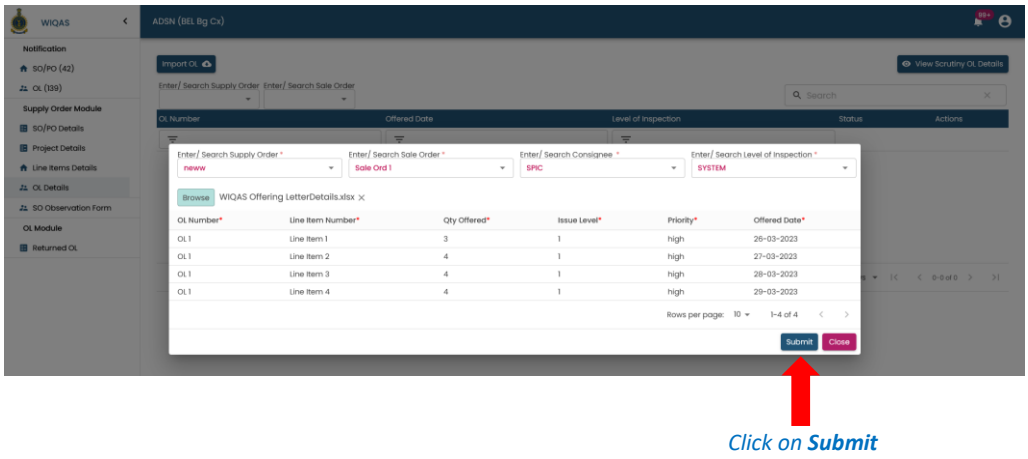

Figure 40: Offer Letter import

STEP 37: One more option to manually enter the **"OL Details"** is by clicking on **"Add OL Details"**. Select the Supply Order, Sale Order, Consignee and Level of Inspection from the dropdown and enter the relevant details. Click on **"Submit"** button. On successful submission **"Saved Successfully"** message will be displayed and data will be available in the tabular format.

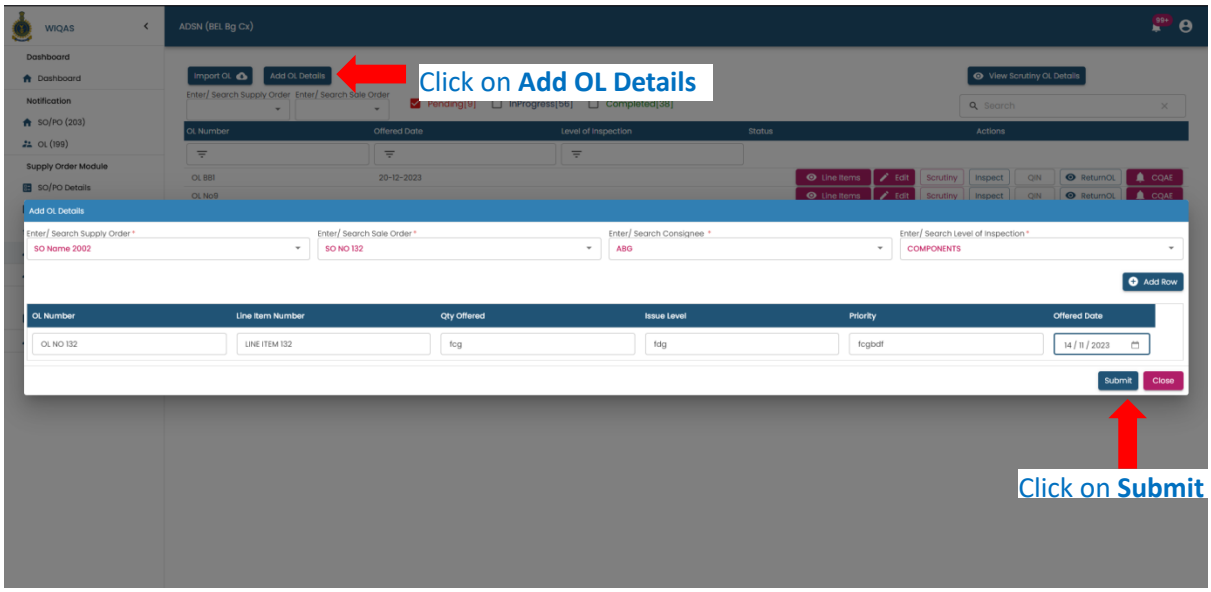

Figure 41: Add Offer Letter

STEP 38: Click on **"Notify"** icon to notify CQAE admin over the import of OL details by SBU admin and to delete OL details click on **"Delete"** icon

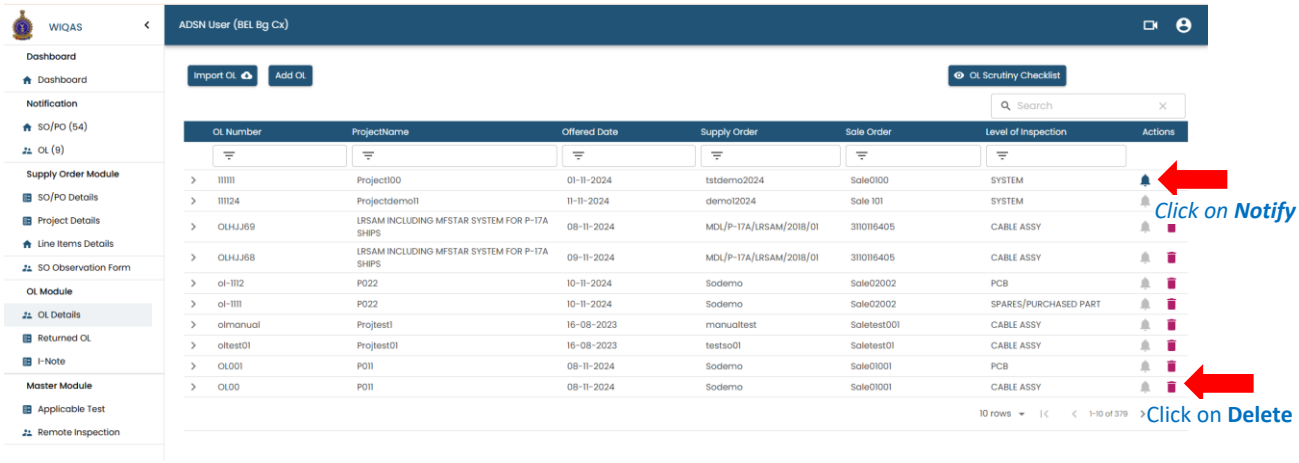

Figure 42: Notify CQAE after raising OL

STEP 39: Click on **"Arrow"** icon to expand and see the respective OL details. Click on "Upload" button to upload files.

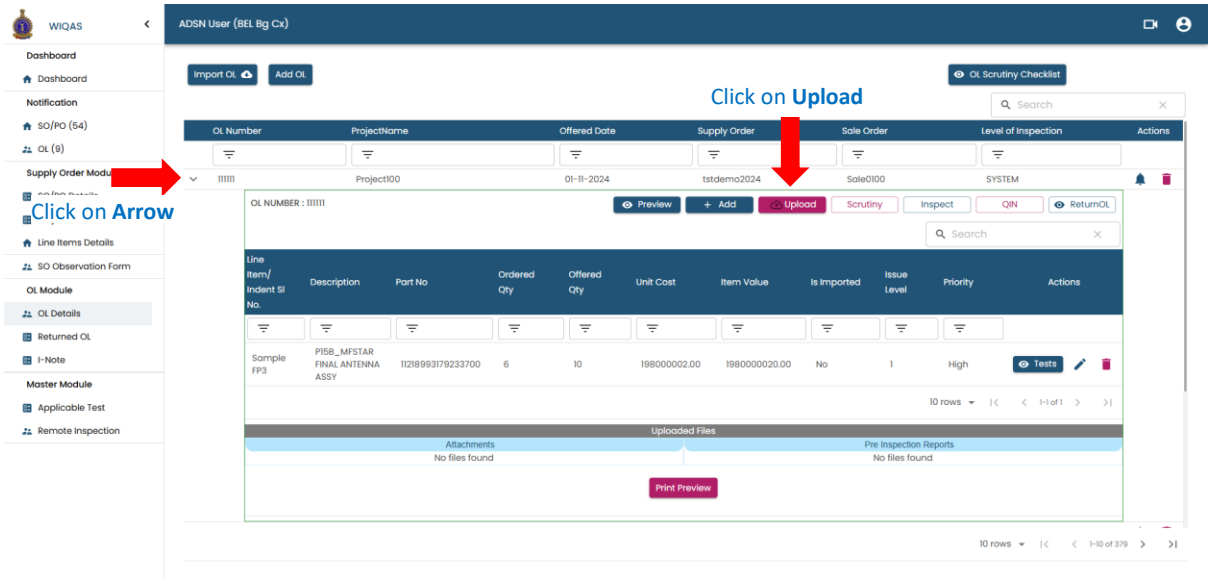

Figure 43: Respective OL Details

STEP 40: Update the necessary details and click on **"Update"** button. On successful submission **"Saved Successfully"** message will be displayed and data will be available in the tabular format.

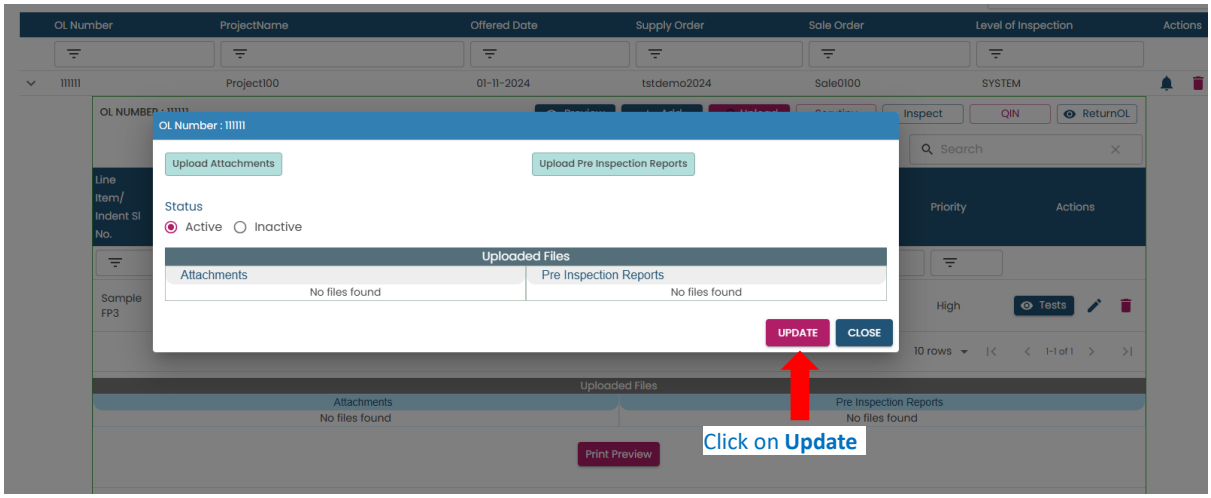

Figure 44: Update OL Details

STEP 41: Here we have option to see **"Preview"** of respective Inspection Test certificate, we have the option to **"Add"** the line items, we have the option to see the **"Scrutiny", "Inspect", "QIN"** and **"Return OL"** performed on the OL.

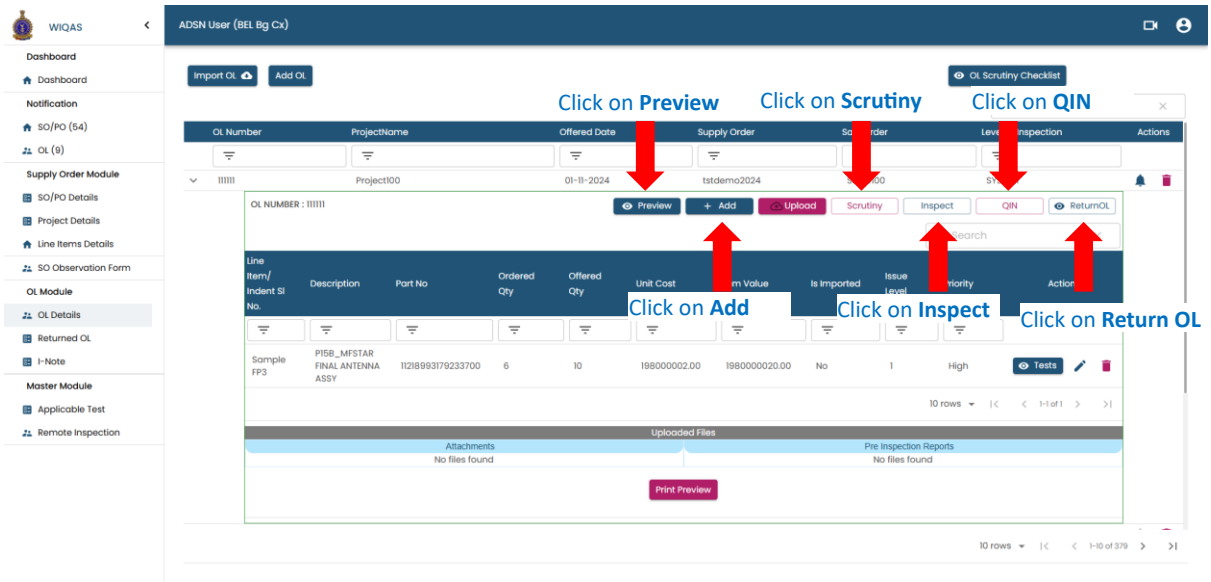

Figure 45: OL Details

STEP 42: The **"Edit"** and **"Delete"** option is provided to edit and delete the line items of respective OL.
Click on **"Tests"** button. A dialog box will be displayed.

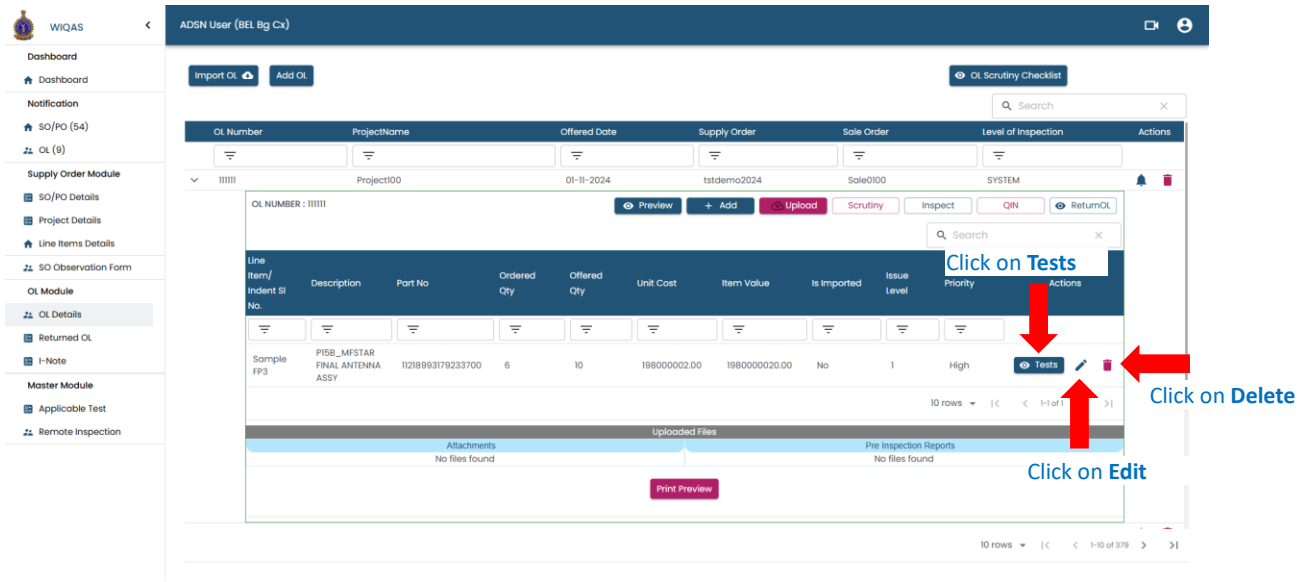

Figure 46: Edit and Delete OL Details

STEP 43: SBU user can add the applicable test to respective OL and **"Submit".** Same will be available for inspector to carry out respective inspection.

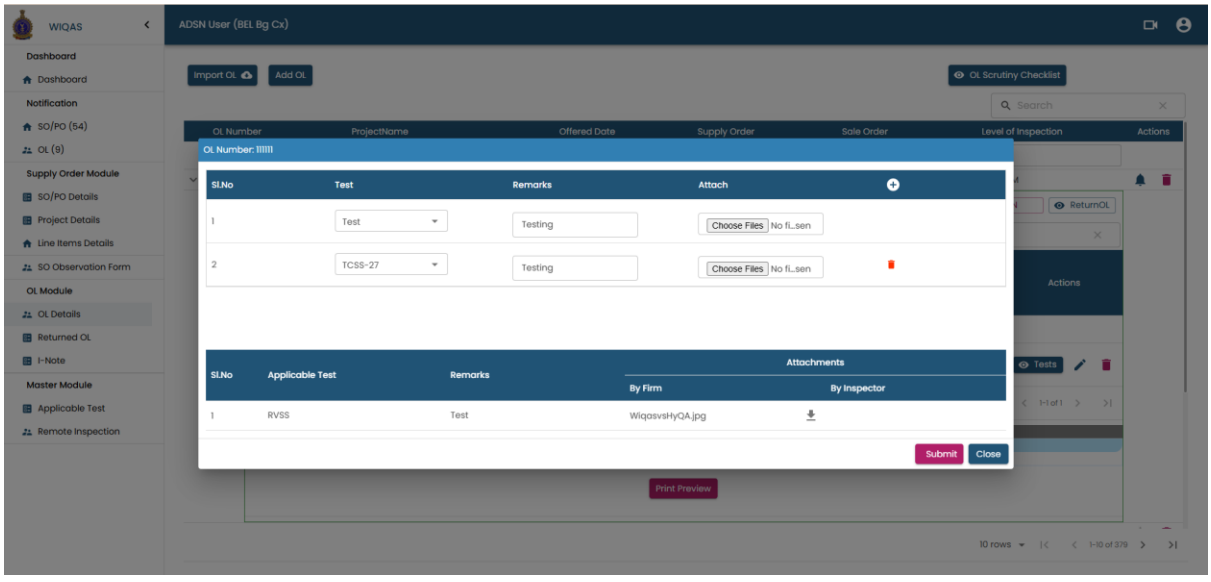

Figure 47: Applicable Tests Sbu admin

STEP 44: In Inspector login, Click on "OL Details", Click on "Inspect" button. Click on "Arrow" icon and list of line items will be displayed. Click on "Tests" button. A dialog will be displayed with applicable test entered by SBU admin. The inspector can download the attachment uploaded by SBU admin and also upload the attachment.

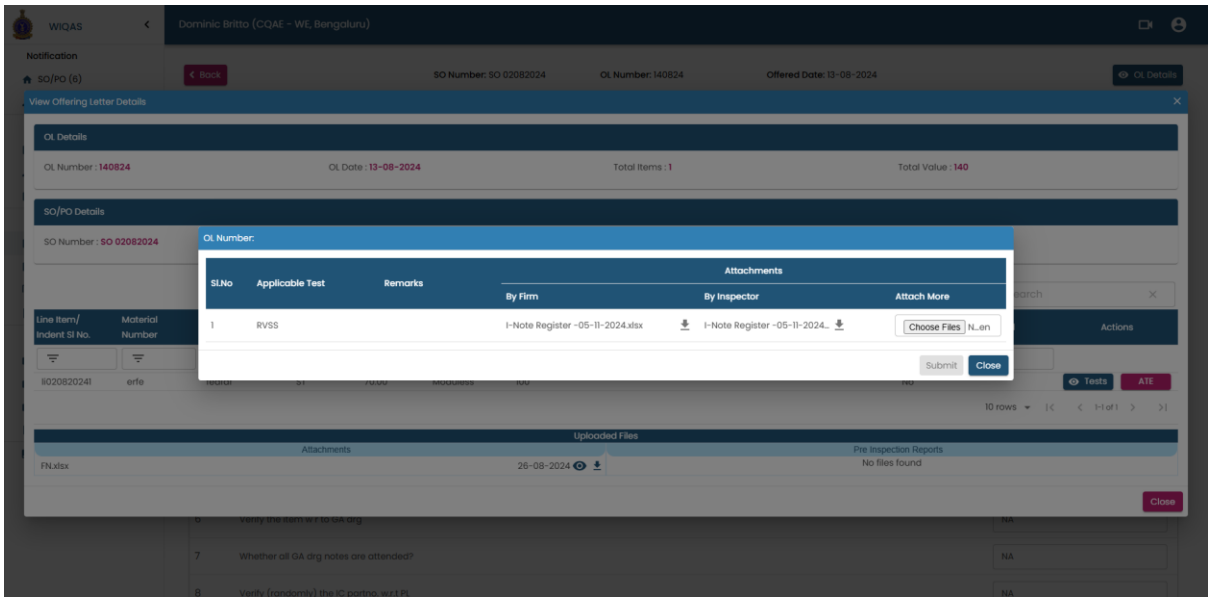

Figure 48: Applicable Tests Inspector

4.11 Offer Letter Allotment

STEP 1: JCQAO will allot OL to the respective inspector by clicking on **"Allot"** button and the inspector will carry out the further process.

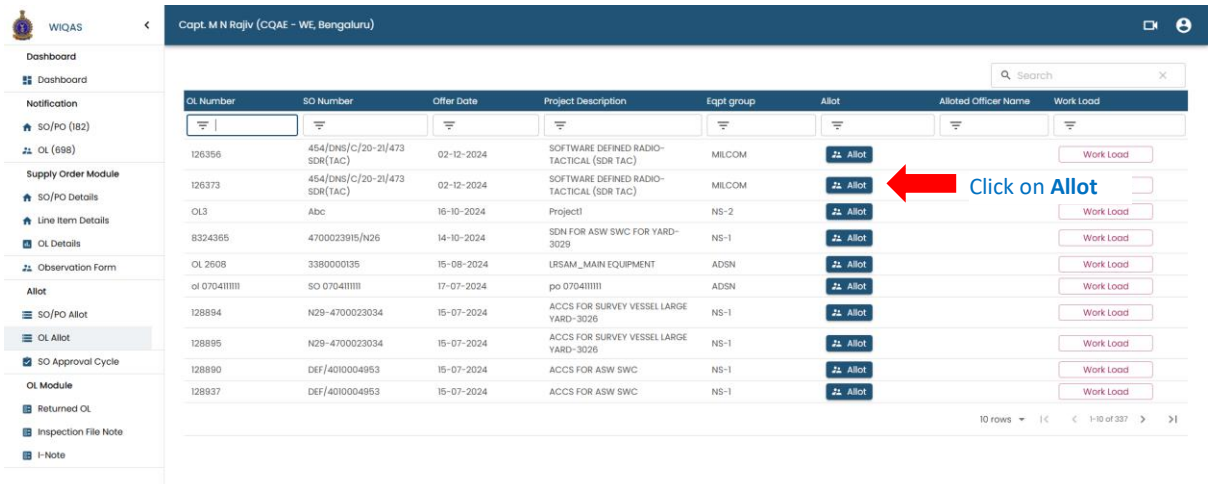

Figure 49: OL Allotment by JCQAO

STEP 2: JCQAO will allot OL by selecting the inspector from the dropdown.

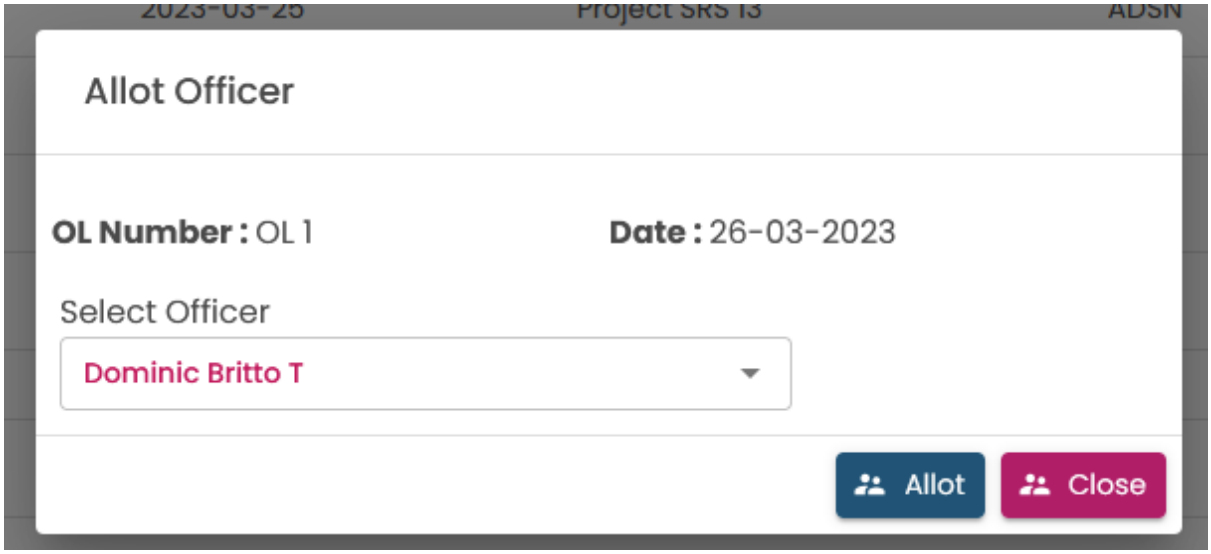

Figure 50: Selection of Officer/Inspector for OL

STEP 3: JCQAO will have the option to **"Re Allot"** OL by selecting the inspector from the dropdown. Also the previous allotted officer name will be displayed in the table.

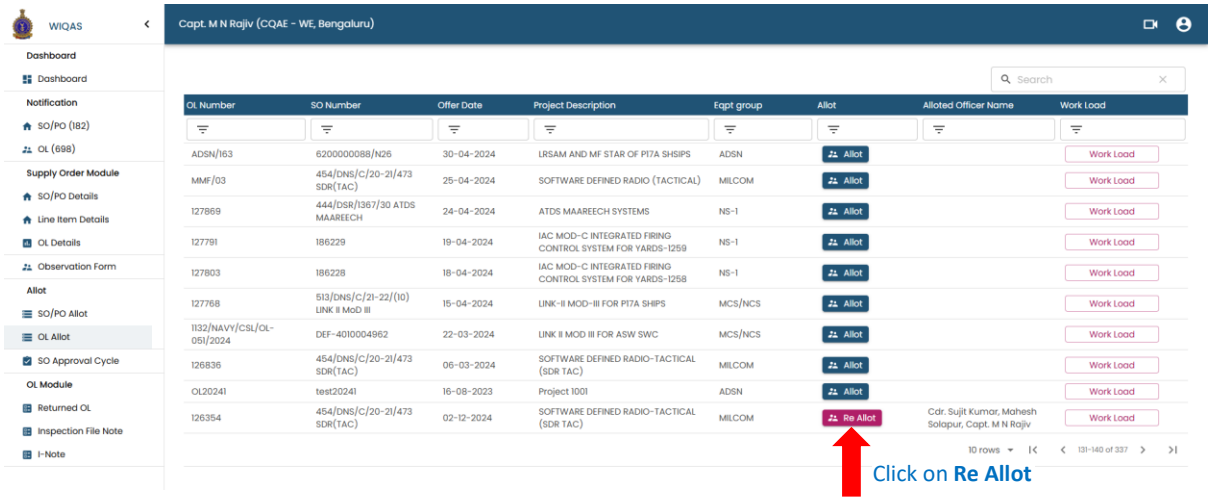

Figure 51: Re Allot of OL

4.12 OL Scrutiny

STEP 1: Inspector will now inspect the OL assigned to him by JCQAO. He started by Scrutiny of OL and followed by Inspect.

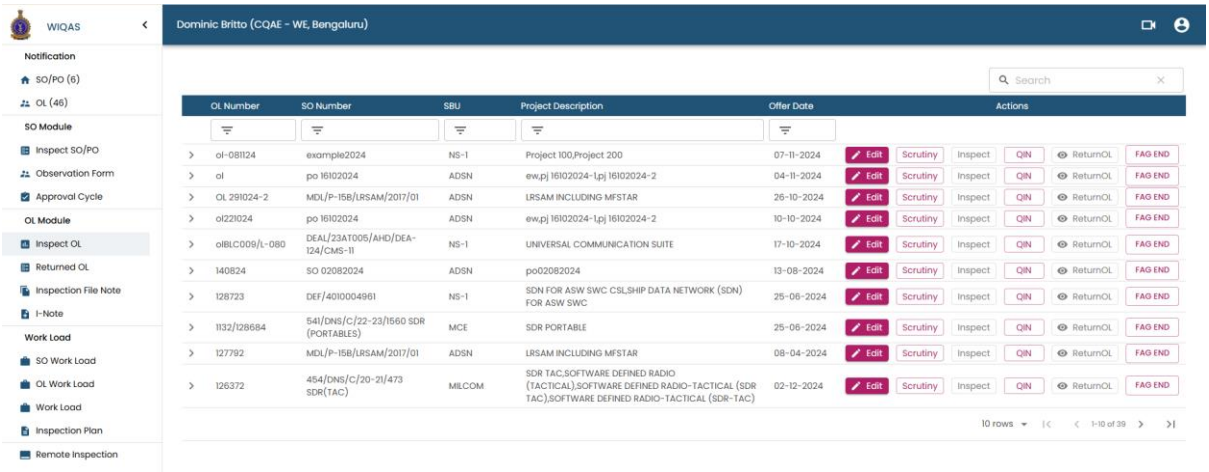

Figure 52: OL options for Inspector

STEP 2: Click on **"Scrutiny"** button, Inspector will write down the Observation and remarks to perform scrutiny of OL. There are two options to save the observations they are **"Save draft"** and **"Submit"**. On click of save draft button, it will save as draft and inspector can edit any number of times. Whereas on click of submit, it will save at once and he cannot edit any further. The inspector can preview and take the print out of the same.

Figure 53: OL Scrutiny

STEP 3: If any of the observation is **"NO"** then OL will be returned by the inspector.

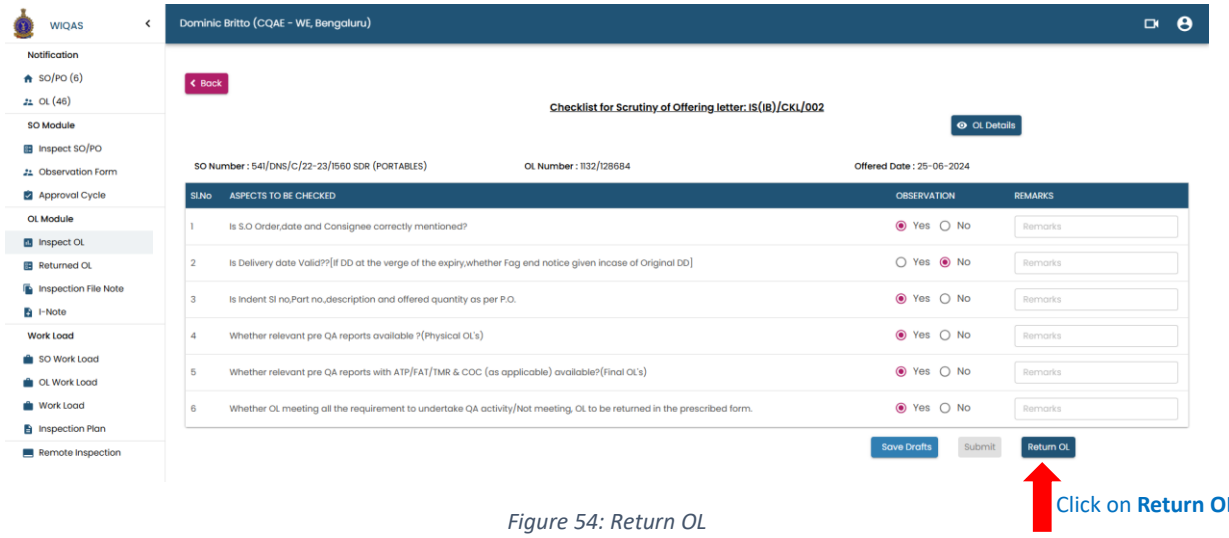

Figure 54: Return OL

4.13 OL Inspection

STEP 4: Click on **"Inspect"** button, Inspector will write down the remarks to inspect the OL. There are different checklists for Physical/ Electrical/ Pre dispatch inspection. Inspector shall select the respective check lists and enter the remarks. There are two options to save the observations they are **"Save draft"** and **"Submit"**. On click of save draft button, it will save as draft and inspector can edit any number of times. Whereas on click of submit, it will save at once and he cannot edit any further. The inspector can preview and take the print out of the same.

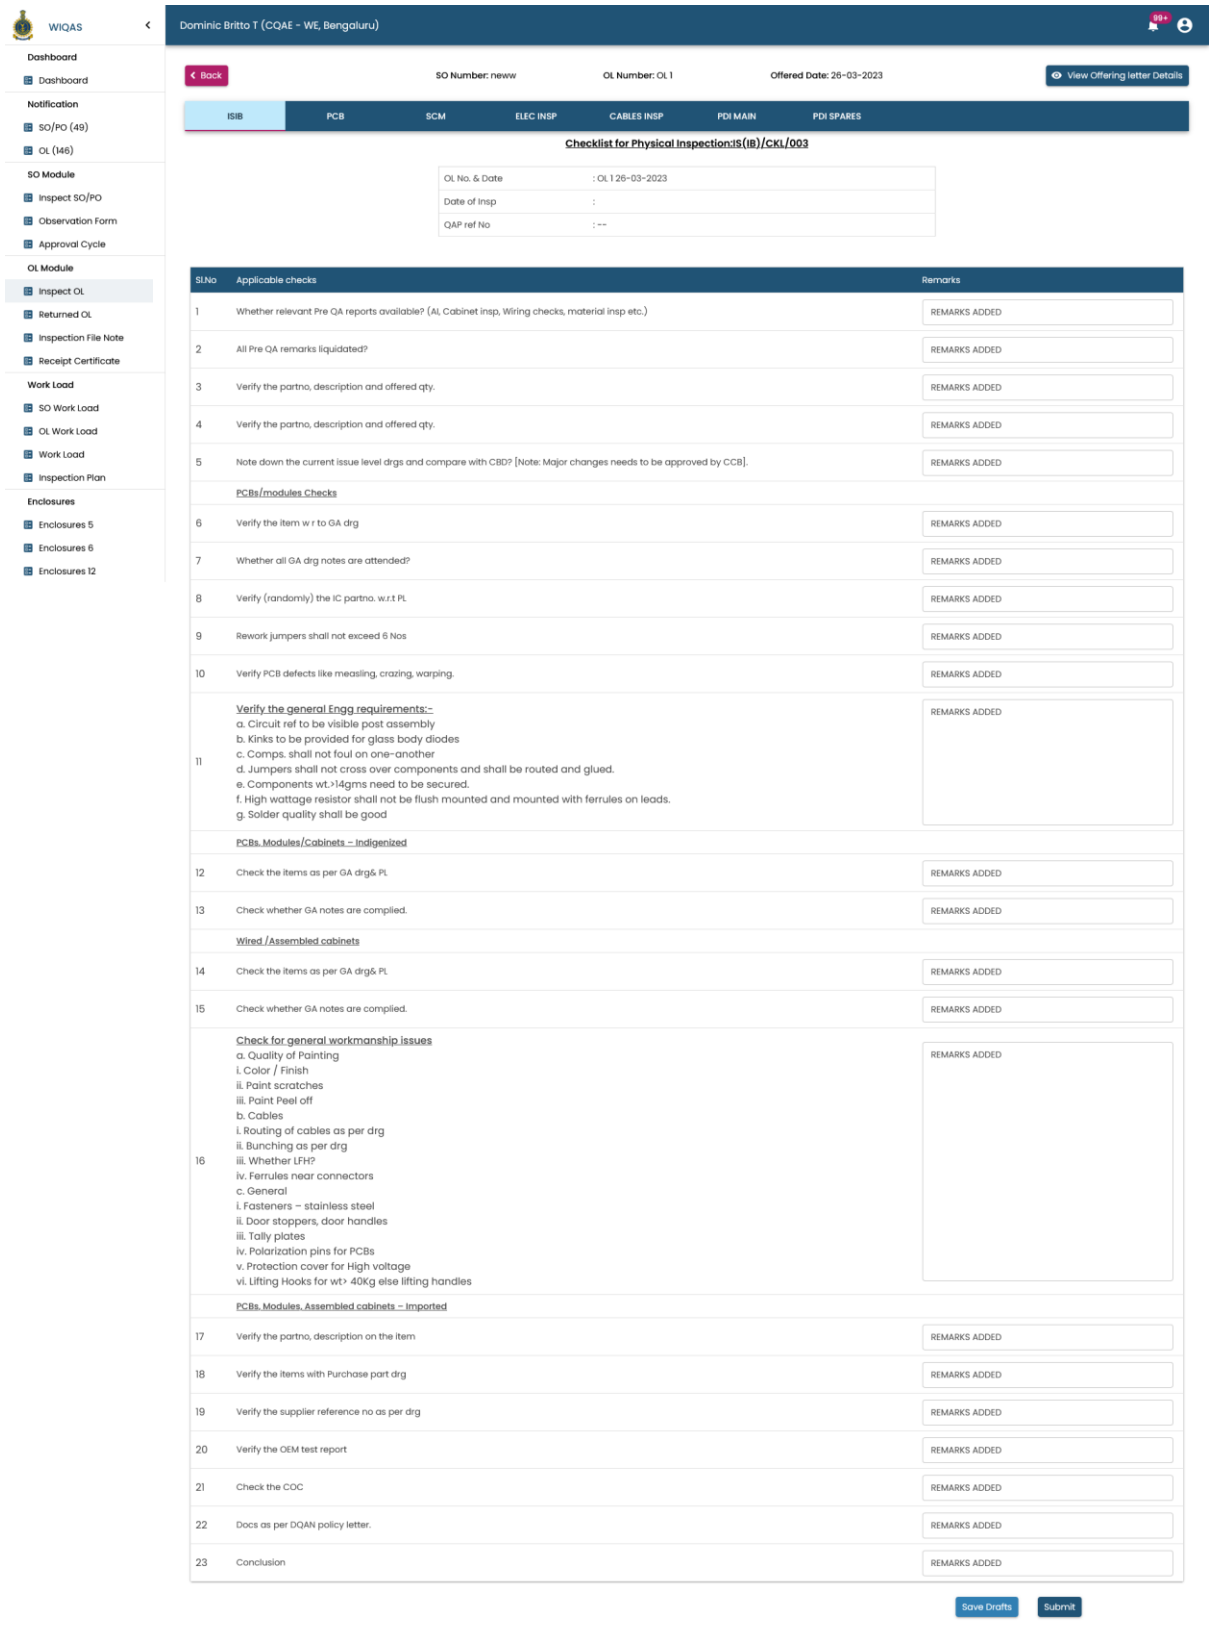

Figure 55: OL Inspection

4.14 Quality Improvement Note (QIN)

STEP 5: After successful inspection of OL if there are any Quality improvement issue, the inspector will click on QIN button in OL table, select the line item from the drop-down and write down the observation and submit.

Then SBU admin will write down Rework/ Action and submit the QIN. Now Inspector will fill the remarks and if he is satisfied with Rework/ Action by SBU admin the closes the observation.

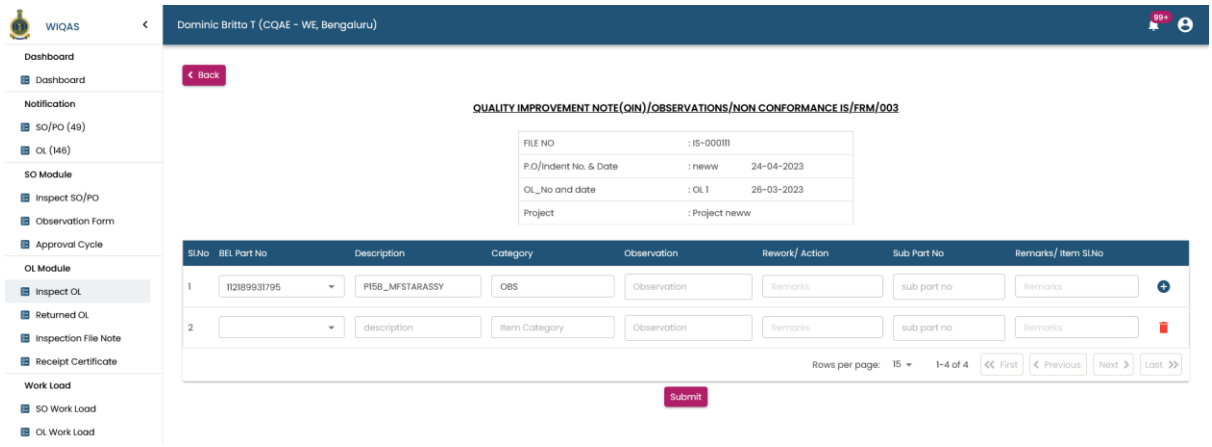

Figure 56: QIN Generation

4.15 Inspection File Note (File Noting)

STEP 6: After Scrutiny, Inspect and QIN of OL, the inspector starts with Inspection File Note. We have option to generate single OL-File Note or merging of multiple OL's and generates the File Note. Click on **"FILE NOTE".** And Generated File Note will be available in **"FILE NOTE"** tab.

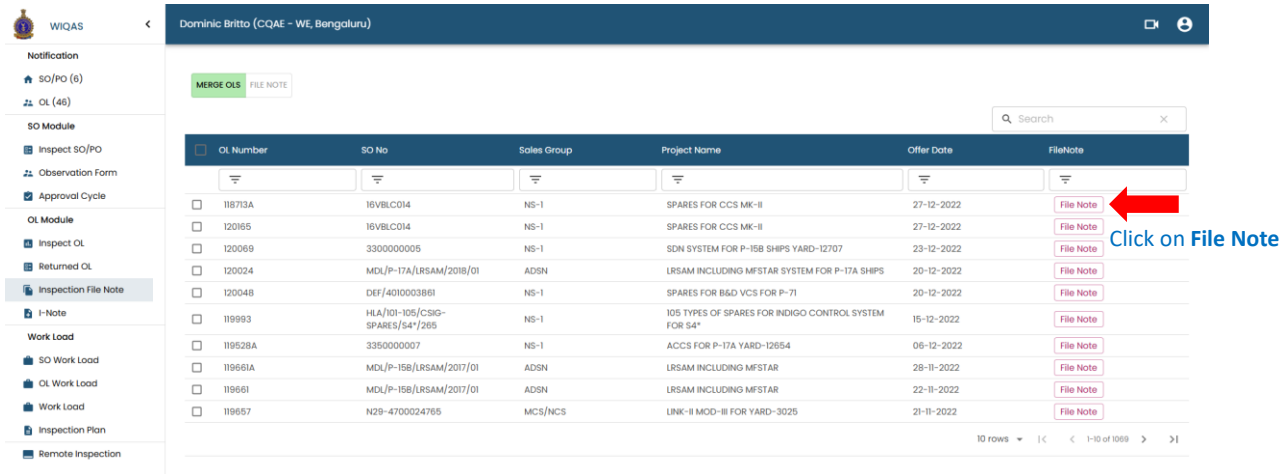

Figure 57: Inspection File Note

STEP 7: Select the respective OL's to be merged in the table and click on the **"Merge OL"** button to start with File Noting. The selected OLs must belong to the same SO/PO.

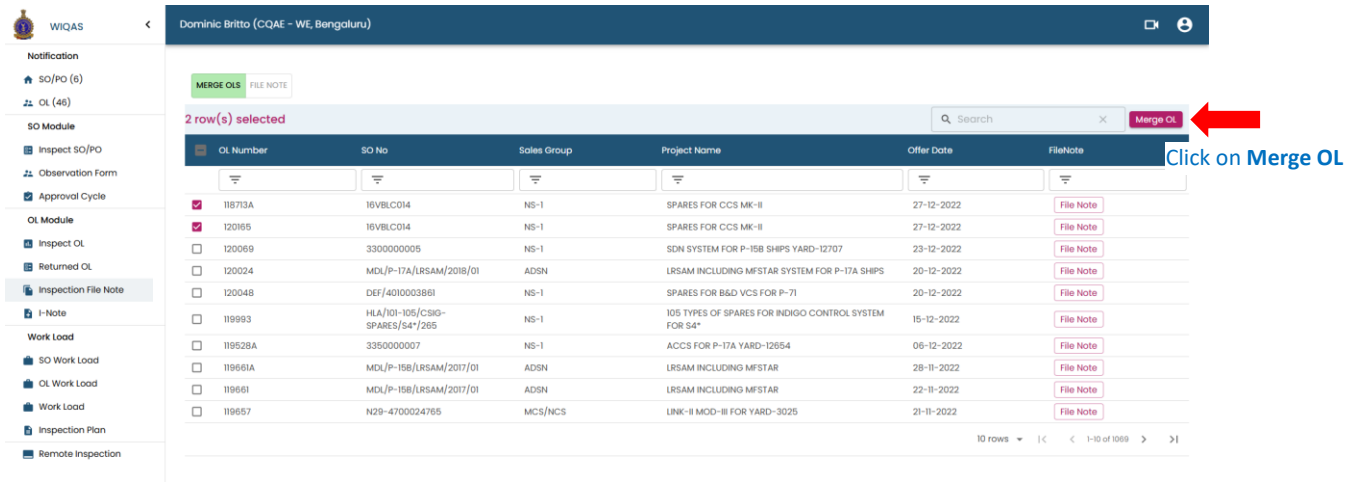

Figure 58: Merge OL

STEP 8: Inspector fills the required fields in Inspection File Note. Option to upload file is provided, Remarks will be entered, and inspector will select signatory and selects next officer for approval. After successful submission, inspector can take print. We have option to **"Save Draft"** where the inspector can save details for multiple times before submitting the data and sending to next approver. And the inspector can edit the details multiple times after submit and until the final approval by CQAO.

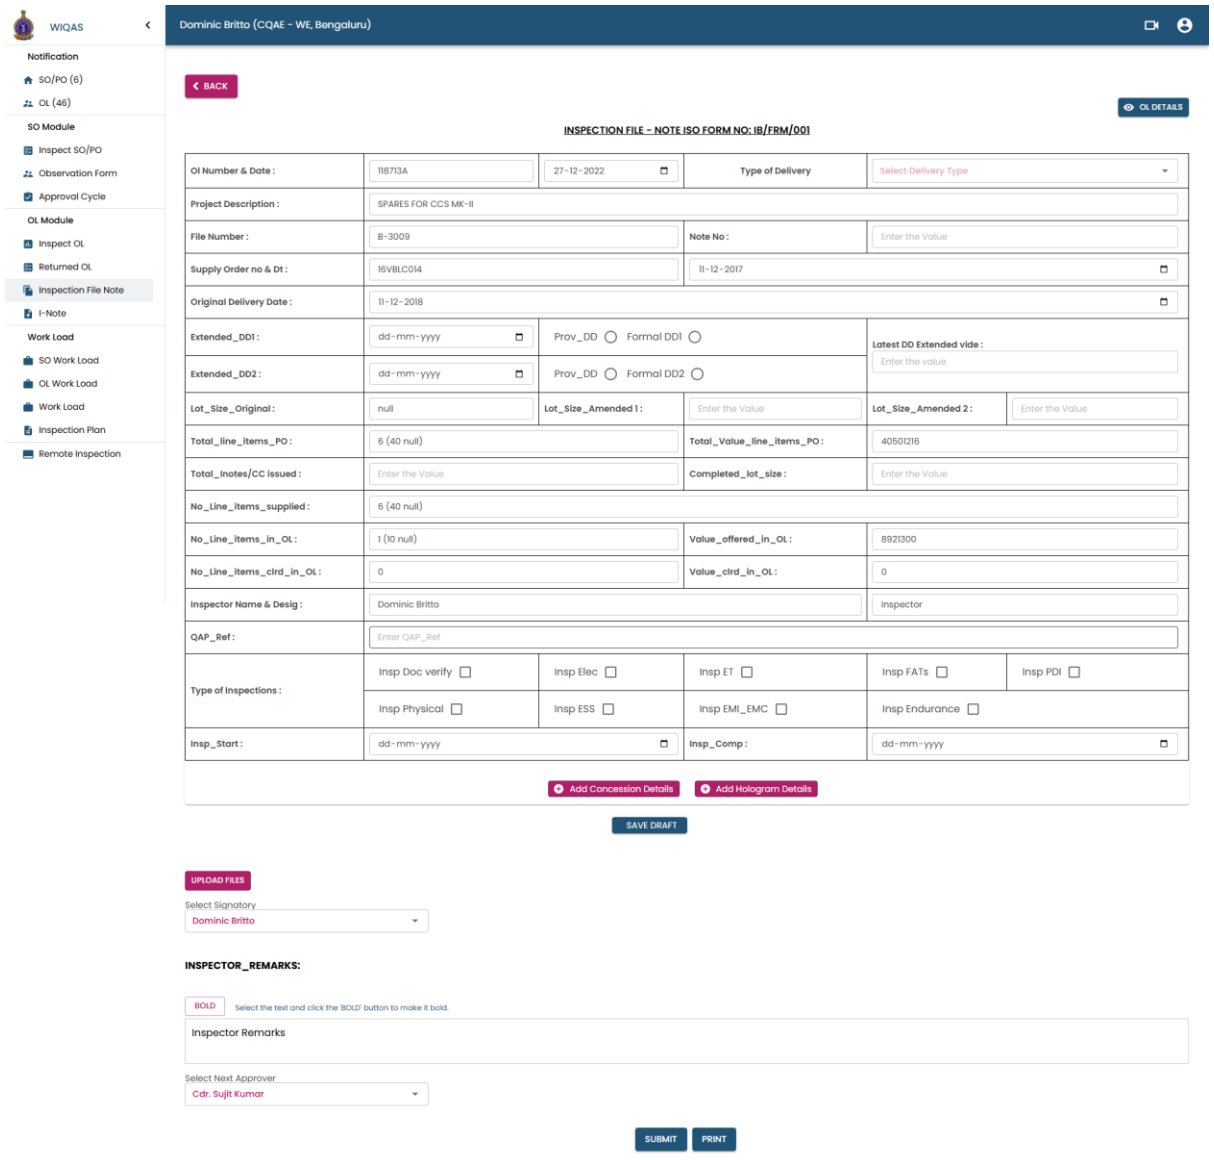

Figure 59: Inspection File Note Generation

4.16 File Noting Approval Cycle

STEP 1: Inspection file note goes through approval cycle. The final approver is CQAO and he either accepts or rejects the remarks entered and writes his remarks for the same. CQAO select the date from date picker and submit the form.

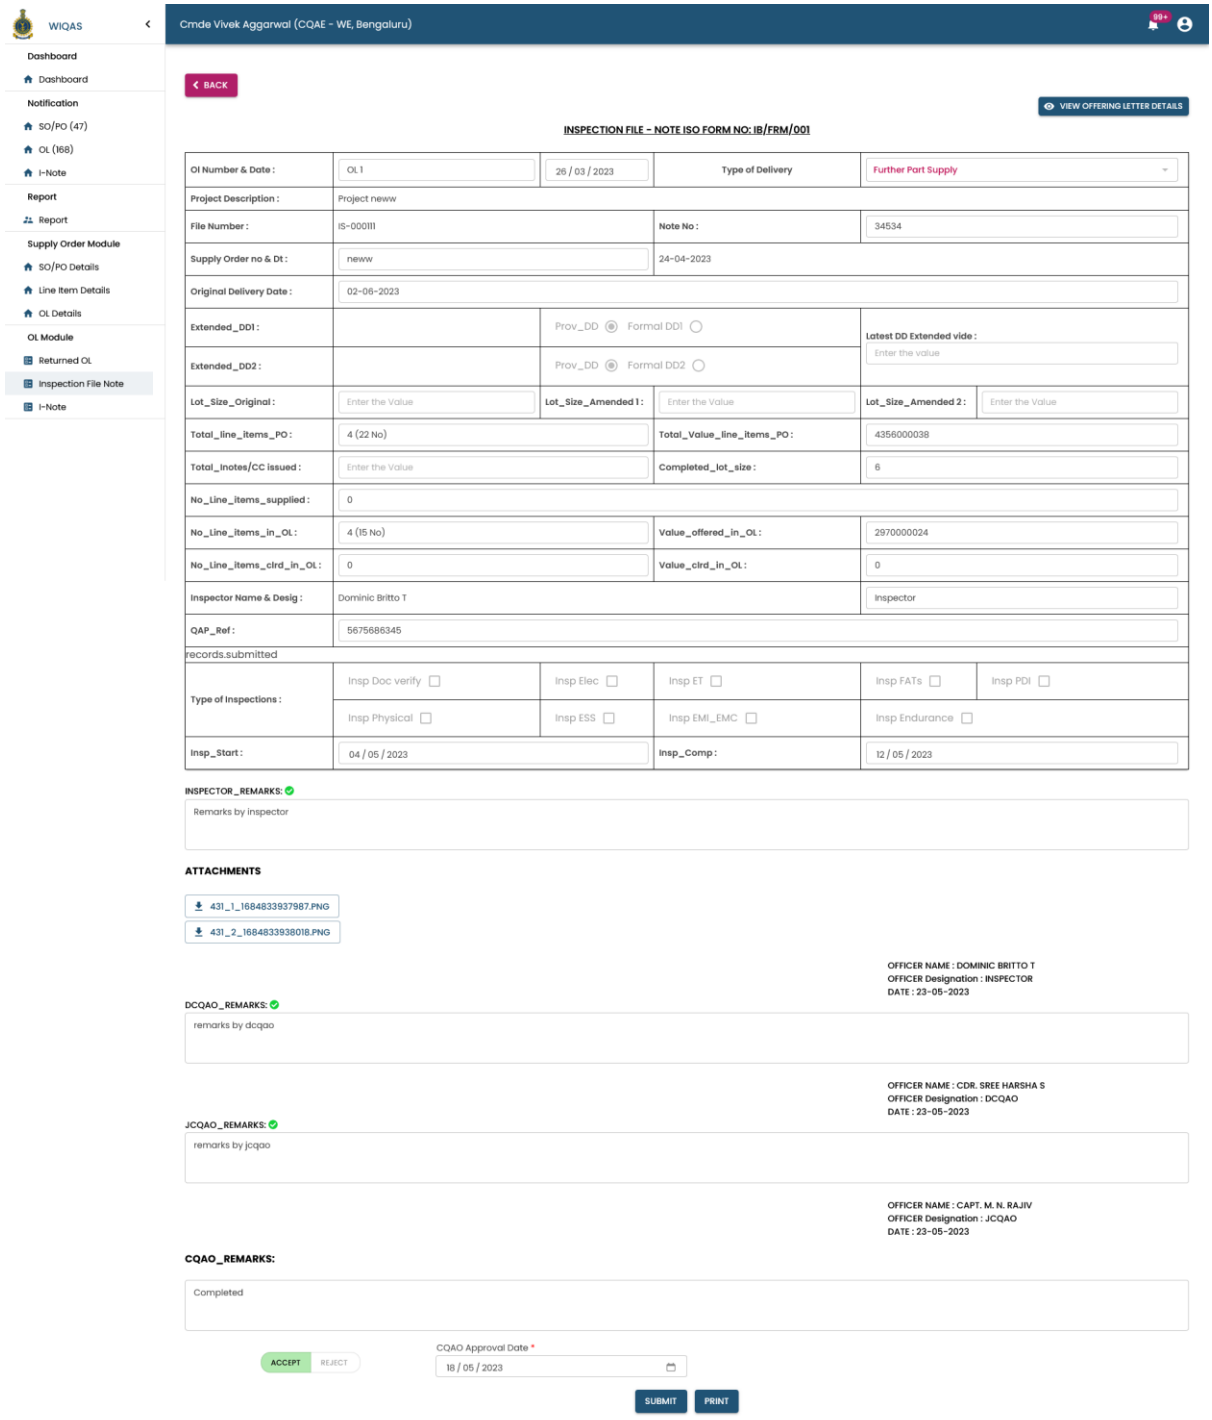

Figure 60: Consolidated view of Inspection File Note

STEP 2: Print can be taken after successful submission.
